Into Thin Air By Jon Krakauer Villard June 8 1997:

Devil's Bargains Hal Rothman, 1998 The West is popularly perceived as America's last outpost of unfettered opportunity but twentieth century corporate tourism has transformed it into America's land of opportunism From Sun Valley to Santa Fe towns throughout the West have been turned over to outsiders and not just to those who visit and move on but to those who stay and control Although tourism has been a blessing for many bringing economic and cultural prosperity to communities without obvious means of support or allowing towns on the brink of extinction to renew themselves the costs on more intangible levels may be said to outweigh the benefits and be a devil's bargain in the making Hal Rothman examines the effect of twentieth century tourism on the West and exposes that industry's darker side He tells how tourism evolved from Grand Canyon rail trips to Sun Valley ski weekends and Disneyland vacations and how the post World War II boom in air travel and luxury hotels capitalized on a surge in discretionary income for many Americans combined with newfound leisure time From major destinations like Las Vegas to revitalized towns like Aspen and Moab Rothman reveals how the introduction of tourism into a community may seem innocuous but residents gradually realize as they seek to preserve the authenticity of their communities that decision making power has subtly shifted from the community itself to the newly arrived corporate financiers And because tourism often results in a redistribution of wealth and power to outsiders observes Rothman it represents a new form of colonialism for the region By depicting the nature of tourism in the American West through true stories of places and individuals that have felt its grasp Rothman doesn't just document the effects of tourism but provides us with an enlightened explanation of the shape these changes take Deftly balancing historical perspective with an eye for what's happening in the region right now his book sets new standards for the study of tourism and is one that no citizen of the West whose life is touched by that industry can afford to ignore

The Flip Side of Free Michael Kende, 2021-03-09 Why free comes at a price the costs of free internet services in terms of privacy cybersecurity and the growing market power of technology giants The upside of the internet is free Wi-Fi at Starbucks Facetime over long distances and nearly unlimited data for downloading or streaming The downside is that our data goes to companies that use it to make money our financial information is exposed to hackers and the market power of technology companies continues to increase In The Flip Side of Free Michael Kende shows that free internet comes at a price We're beginning to realize this Our all-purpose techno caveat is I love my smart speaker but is it really tracking everything I do listening to everything I say

An Eye at the Top of the World Pete Takeda, 2009-04-13 At some point during the inhumanly cold Himalayan winter straddling 1965 and 1966 a peculiar collection of box shaped objects one sprouting a six foot insect like antenna plummets nine thousand feet down the sheer flanks of a remote peak Ripped from its moorings by an avalanche the jumbled apparatus slides down a funnel shaped hourglass of hard snow and shoots over a black cliff band careening a vertical distance six times the height of the Empire State building The boxes come to rest on the glacier at the mountain's base One an olive drab casing the size of a personal computer begins to sink Then trailing a robotic dogtail of torn wires it slowly burns through the snow melting into solid blue glacial ice eventually disappearing beneath the surface and never seen again No one actually witnessed this event But as you read these words nearly four pounds of plutonium locked in the glacier's dark unknowable heart are almost certainly moving ever closer to the source of the Ganges River Eye at the Top of the World provides a harrowing present day account of Takeda's expedition to solve the mystery of Nanda Devi

Seeing and Being Seen David M. Wrobel, Patrick T. Long, 2001 You can see them cruising for Indian art in Santa Fe waiting for Old Faithful at Yellowstone or pausing for shrimp cocktails on San Francisco's Fisherman's Wharf The American West attracts vacationers of every stripe who comb its varied landscapes for the ultimate trip And for better or worse those who come to see this multifaceted region have changed what they have come to see Seeing and Being Seen explores the history of tourism in the American West and examines its effects on both the tourists and the places and people they visit Scholars from the humanities social sciences and business Patricia Nelson Limerick Hal Rothman and others join government and National Park Service professionals to investigate the dilemmas that tourism poses for western communities from economic and

environmental questions to cultural change The selections are organized around three broad topics scholarly perceptions of tourism tourists and those toured upon tourism in its historical context including an assessment of its cultural impact on communities and on tourists themselves and the history and impact of tourism on the West's national parks with particular emphasis on efforts to maintain the delicate balance between natural preservation and public enjoyment These essays cover the span of tourism history from early twentieth century See America First campaigns to the problematic place of automobiles in national parks today They also pay special attention to policy choices that the growth of tourism sometimes forces on communities as towns try to bounce back from failed economies by capitalizing on an Old West image or even in the case of Kellogg Idaho Old Bavarian In response the authors offer suggestions by which communities can begin to make rational choices about the role and place of tourism in their lives Seeing and Being Seen is enlightening and necessary reading for scholars policy makers residents of the West and even tourists themselves **Living It Up** James B.

Twitchell,2003-07-02 From neighborhood supermarkets stocked with designer water to the exclusive boutiques of Madison Avenue this witty look at spending habits joins Bobos in Paradise and Why We Buy in capturing what drives the way consumers live and shop today *Undefended* Daniel Bush,2017-02-08 Loneliness fear vulnerability conflict pain these aren't experiences we typically seek out And yet we all encounter them during our lives Do you embrace these times or do you raise your defenses determined not to get hurt What if it's possible to see God more clearly in the midst of these trials In *Undefended* Daniel Bush shows readers how to approach life's difficulties from a gospel centered and grace driven perspective arguing that the experiences we avoid can actually bring us nearer to Christ Drawing on examples from the Bible history popular culture and the author's own life *Undefended* seeks to personally acquaint readers with an experience of the inner heart where true discovery of God takes place Bush writes out of a deep passion for helping others find spiritual awakening stemming from over 15 years in pastoral and counseling ministries He guides readers through ten different experiences that can show us the authentic heart of God if we approach him undefended **Color Monitors** Martin

Kevorkian,2018-07-05 *Color Monitors* looks at a particular subset of imagined computer use focusing on scenarios that demand from the person at the keyboard an intimate technical knowledge My research has uncovered a peculiar pattern race comes into sharp relief when computer use is depicted as difficult labor requiring special expertise Time and again in such scenarios the helpful person of color is there to take the call to provide technical support to deal with the machines In interpreting such images *Color Monitors* analyzes the computer fearing strain in American whiteness an aspect of white identity that defines itself against information technology and the racial other imagined to love it and excel at it Martin Kevorkian Following up on Ralph Ellison's intimation that blacks serve as the machines inside the machine *Color Monitors* examines the designation of black bodies as natural machines for the information age Martin Kevorkian shows how African Americans are consistently depicted as highly skilled intelligent and technologically savvy as they work to solve complex

computer problems in popular movies corporate advertising and contemporary fiction But is this progress Or do such seemingly positive depictions have more disturbing implications Kevorkian provocatively asserts that whites historical fear of a black planet has in the age of microprocessing converged with a new fear of computers and the possibility that digital imperatives will engulf human creativity Analyzing escapist fantasies from Mission Impossible to Minority Report Kevorkian argues that the placement of a black man in front of a computer screen doubly reassures audiences he is nonthreatening safely occupied even imprisoned by the very machine he attempts to control an occupation that simultaneously frees the action heroes from any electronic headaches The study concludes with some alternatives to this scheme looking to a network of recent authors with shared affinities for Ellison and Pynchon willing to think inside the black box of technology Connecting race technology and American empire Color Monitors will attract attention from scholars working in emerging areas of race theory African American studies film studies cultural studies and technology and communication studies [The United States Patents Quarterly](#) ,2009
