

Research Paper Sample Introduction

Business leadership has been described as the 'ability to influence, motivate and enable others to contribute to the effectiveness and success of the organizations of which they are members' (House, Hanges, Javidan, Dorfman, & Gupta, 2004, p. 63). Whether this ability is something a person is born with, or whether it is something that a person can learn, has been the subject of considerable debate. Kambil (2010) has outlined two categories of leadership attributes that help to frame the discussion: 'traits' (mostly innate) and 'skills' which can be developed through experience or training. This essay will draw on the trait theory of leadership to argue that that leaders are first born, but then must be made. While good business leaders share certain traits that are essential to success, including 'curiosity, courage, perseverance, personal ethics and confidence' (Kambil, 2010, p.43), they also need learnable skills, such as communication, negotiation and conflict resolution, that are only developed through practice. A potential leader should develop their natural traits as well as learn and practice skills which will help them to persuade, equip and inspire others to realize their vision.

Pediatric Oculoplastic Surgery James A. Katowitz, William R. Katowitz, 2017-11-30 This well illustrated book presents

the latest diagnostic concepts and management techniques in the rapidly expanding subspecialty of pediatric oculo-facial plastic surgery. Covering all aspects of the field and taking into account numerous surgical innovations and exciting new medical treatment concepts that have emerged since publication of the previous edition in 2002, *Pediatric Oculoplastic Surgery* 2nd Edition will prove to be an invaluable resource for both the comprehensive ophthalmologist and the subspecialist with a particular interest in pediatric disorders of the eyelids, orbit and nasolacrimal system. Topics discussed in addition to clearly illustrated basic oculoplastic procedures include surgical innovations ranging from the Sonopet system for safer removal of bone in lacrimal surgery to the development of complex image guidance technology for sinus and orbital surgery. Detailed discussion of syndromic and non syndromic congenital anomalies explore a variety of surgical techniques and the nuances of applying these approaches in the management of various structural abnormalities. Further important advances include new analytic laboratory techniques which can illuminate the genetic basis of many pediatric oculoplastic disorders, various medical management advances such as the role of beta blockers in the treatment of facial and orbital hemangiomas and the development of biologic pathway blockers inhibiting tumor growth which offer real potential for reducing the necessity of surgical intervention.
