Phil Croucher, 2014-09-24 Until recently the only option for instrument rating training in Europe was a full course requiring  
up to 200 hours of theoretical knowledge instruction but the Enroute and Competency Based Instrument ratings for  
aeroplanes only are a part of a new approach that is supposed to make instrument flying more accessible because the  
original courses were designed as part of a commercial course and were necessarily intense This book is for people who  
already hold an ICAO IR and who can simply convert to the EASA version by completing the skill test and demonstrating to  
the examiner during the skill test an adequate knowledge of air law meteorology and flight planning It contains all the  
information needed to answer the examiner's questions plus tip and tricks not usually taught on such a basic course      *The*

Beijing China to Busan Korea crashed on Mt Dotdae near Gimhae Airport Busan Of the 166 persons on board 37 persons  
survived the crash while 129 occupants were killed The Korean Aviation Accident Investigation Board KAAIB determined that  
the probable cause of the crash was pilot error due to poor crew resource management and lost situational awareness during  
the circling approach of the runway The Chinese investigation team pointed out that the Korean ATC was not fully licensed  
and mistakenly directed the airliner to descend to a wrong altitude and that the airport did not inform the crew of the  
weather conditions at the time A contributing factor was that the airline made all announcements in Chinese and English  
while most passengers were Korean      *General Government Matters, Department of Commerce, and Related Agencies*
