Africa is on the rise and by 2050 the continent will be home to a quarter of the world's population. The analysis presented in this book clearly shows that the African food system needs to transform at a much faster pace to ensure that the people it serves are food secure. This book begins with four contrasting case studies that focus on country-specific challenges in Egypt, Ethiopia, Senegal, and Zimbabwe. This is followed by 15 thematic chapters organised in three sections on challenges, threats, and opportunities. Individual chapters address a wide range of topics including climate change, water security, farm sizes, crop yields, conservation, trade-offs, food prices, trade conflict, and structural change. The book concludes by discussing key pathways to improve Africa's food system and food security for the decades ahead. This book is essential reading for students, scholars, and practitioners who work on global food security, sustainable food systems, food health, and nutrition, and African development.
