Learning Programme Guidelines Life Orientation:

Life Orientation Gr8 T/g , International Handbook of Inter-religious Education Kath Engebretson, Marian de Souza, Gloria Durka, Liam Gearon, 2010-08-17 This Handbook is based on the conviction of its editors and contributing authors that understanding and acceptance of as well as collaboration between religions has essential educational value The development of this Handbook rests on the further assumption that interreligious education has an important role in elucidating the global demand for human rights justice and peace Interreligious education reveals that the creeds and holy books of the world's religions teach about spiritual systems that reject violence and the individualistic pursuit of economic and political gain and call their followers to compassion for every human being It also seeks to lead students to an awareness that the followers of religions across the world need to be and to grow in dialogical relationships of respect and understanding An essential aim of interreligious education is the promotion of understanding and engagement between people of different religions and therefore it has great potential to contribute to the common good of the global community Interreligious education has grown from the interfaith movement whose beginning is usually identified with the World Parliament of Religions held in Chicago in 1893 This was the first time in history that leaders of the eastern and western religions had come together for dialogue and to consider working together for global unity *Life Orientation & Assessment Grade 5 T/g* , *Life Orientation & Assessment Grade 6 T/g* , 2004 **Making Connections** Kathleen Pithouse, Claudia Mitchell, Relebohile Moletsane, 2009 This book follows on from a symposium that was held in Durban South Africa in July 2007 The symposium was called Seeing for Ourselves Exploring the Practice of Self Study in Teaching Learning and Researching for Social Change The Durban Symposium as called in this book was actually the second in a series of invitational international symposia organized through the second in a series of invitational international symposia organized through the Centre for Visual Methodologies for Social Change in the Faculty of Education University of KwaZulu Natal Committed as it is to the use of visual and other participatory methods within textual research in order to bring about social action the Centre for Visual Methodologies for Social Change started off its symposia series with Putting People in the Picture an event that eventually led to the publication of an edited book Putting People in the Picture Visual Methodologies for Social Change edited by Naydene de Lange Claudia Mitchell Jean Stuart 2007 Sports Global Influence: A Survey of Society and Culture in the Context of Sport Skye G. Arthur-Banning, Solomon Waliaula, 2020-06-15 This volume was first published by Inter Disciplinary Press in 2015 Evolving sport cultures have had the dual capacity of both illuminating the inner human experience while also connecting this experience to outer socio economic institutional practices The unique chapters of this book capture the processes that define this simultaneous centripetal and centrifugal motion of sport such the opportunity sport can provide for social change in a community out to the bigger debates of global marketing and state legitimacy that accrue from sport Stock discourses on sport such as sport commodification mediatization instrumentalization social and physical capital of sport and the role of sport in the contours of geopolitics and

international diplomacy are explored both in their theoretical framing and also in specific scenarios and locations The collection of works span from Qatar to South Africa the United States to England and provides a modern look at sport s interdisciplinary shape in the global context of society and culture *New Africa Social Sciences* Sue Heese,2004 **The Ultimate Guide to Implementing Wellbeing Programmes for School** Jolanta Burke,2020-12-29 This is an essential guide for all teaching professionals to help them make an informed decision about what wellbeing programmes and initiatives they should select in their schools and why It provides teachers and school leaders with all necessary knowledge to help identify what they should be looking for in wellbeing programmes how they should be evaluating its effectiveness and who should be delivering it for them It presents a suite of components and evidence based interventions that teachers can pick and choose for their school community For the first time practitioners are not being sold a specific programme but instead presented with what is known about wellbeing in order to empower them to make their own decisions that best suit their community It goes behind the scenes and reveals the secrets used by researchers and experts including practical advice recommendations and the author s own ground breaking research study involving 3 000 students Its unique pick and mix process demystifies programme creation simplifies it and makes its building blocks available to the masses This accessible evidence based guide suggests a whole school approach with specific interventions that can be used to successfully improve the wellbeing of teachers and students making it an invaluable resource and must read for all teaching professionals

Educational Technology and Pedagogic Encounters Yusef Waghid,2016-07-15 This book looks at some of the underlying theories of educational technology means and ways in which this technology is guided in practice ends The authors are intent on producing ends that prepare students to undertake new analyses and evaluations that can result in new possibilities for democratic action Emphasis is on their understanding of and position within educational technology as opposed to using or applying educational technology The work is not written from the point of view that their embeddedness within educational technology has a utilitarian end in mind but rather that their situatedness within educational technology a practice in itself leaves open possibilities for new ways of understanding democratic education This book is organised into six interrelated themes that work towards the cultivation of educational technology as a human practice which guides pedagogic encounters on the basis of taking risks in relation to which the unexpected unimaginable is always possible *'Adolescence', Pregnancy and Abortion* Catriona I. Macleod,2010-07-07 Winner of the Rhodes University Vice Chancellor s Book Award 2012 Winner of the 2011 Distinguished Publication Award of the Association for Women in Psychology Why despite evidence to the contrary does the narrative of the negative consequences of teenage pregnancy abortion and childbearing persist This book argues that the negativity surrounding early reproduction is underpinned by a particular understanding of adolescence It traces the invention of adolescence and the imaginary wall that the notion constructs between young people and adults Macleod examines the entrenched status of adolescence within a colonialist discourse that equates development of the individual with

the development of civilisation and the consequent threat of degeneration that adolescence implies Many important issues are explored such as the invention of teenage pregnancy and abortion as a social problem issues of race culture and tradition in relation to teenage pregnancy and health service provider practices specifically in relation to managing risk In the final chapter an argument is made for a shift from the signifier teenage pregnancy to unwanted pregnancy Using data gathered from studies worldwide this book highlights central issues in the global debate concerning teenage pregnancy It is ideal for academics and students of health psychology women s studies nursing and sociology as well as practitioners in the fields of youth and social work medicine and counselling
