Secondary Education in Modern India (1800 – 2022) Dr V.B. Shastri, 2023-03-24 Secondary Education in Modern India 1800 2022 is a rare treatise of educational research based on authentic primary data collected directly from archives. It spans two centuries and two decades of development of Secondary Education in India from its faint faltering beginnings to the nationwide obsession with it today. It covers the gradual evolution of secondary education in India, presenting in detail the changing policies and programs, reports of different National Education Commissions, and the structural changes over a vast time frame. It is an invaluable reference book for students of education and those engaged in researching the development of education in India. Annual Report National Council of Educational Research and Training (India), 2002 *Innovative Strategies for Accelerated Human Resources Development in South Asia* Asian Development Bank, 2017-12-01 Significant investments have been made to modernize and improve the provision of education services. Strengthening teacher development has been a key component of these investments. However, programs on teacher development have provided mixed results. This report adopts a 360-degree perspective to review the current status of teacher development, demand, and supply, and performance management in five countries from the South Asia region, including Bangladesh, Nepal, and Sri Lanka, with limited reference to Bhutan and Maldives. It probes beyond teacher in-service training and teacher job conditions and investigates systemic and structural issues. Continued investment may not be the best option to improve the quality and supply of teachers, and so the challenge is how to leverage resources to meet the demand.
