Improving a Country's Education Nuno Crato,2020-11-23

This open access book compares and contrasts the results of international student assessments in ten countries

The OECD s Programme for International Student Assessment PISA released the results of its 2018 assessment in December 2019

This book reflects the debates that typically follow the release of these results and focuses on the causes of differences between countries

Such causes include continuous decline in one country improvement combined with increasing internal inequalities in another country or rapid improvement in spite of an outdated curriculum in yet another

In addition the book discusses a number of general questions

Is knowledge outdated

Are computers taking over and replacing teachers

Are schools killing creativity

Are we adequately preparing the next generation

Are schools failing to educate our kids

The book starts out with a summary of PISA s evolution and PISA results and an explanation of the major factors that play a role in changes in countries results

The next ten chapters are devoted to ten specific countries offering a summary of data and an explanation of the major drives for changes in education results for each one

Each chapter includes a short description of the country s educational system as well as the impact of PISA and other ILSA studies on the country s educational policies

The chapters also include a timeline of policy measures and main

hallmarks of the country's educational evolution discussing the impact of these measures on its PISA results A final reference chapter explains what PISA is what it measures and how While highlighting the 2018 results the book also takes into consideration previous results as well as long term initiatives This book gathers the contribution of well known and respected experts in the field Specialists such as Eric Hanushek for the US Tim Oates for England Montse Gomendio for Spain Gunda Tire for Estonia and all other contributors draw on their vast experience and statistical analysis expertise to draw a set of rich country lessons and recommendations that are invaluable for all of those who care about improving a country's education system
