A Fan's Guide to Baseball Analytics Anthony Castrovine, 2020-05-12 Broken up into sections pitching fielding hitting this authoritative yet fun and easy guide will help readers young and old fully understand and comprehend the statistics that are the present and future of our national pastime We all know what a 300 hitter looks like The same with a 20 game winner Those numbers are ingrained in our brains But do they mean as much as we think Do we feel the same way when we hear a batter has a 390 wOBA How about a pitcher with a 1.2 WHIP These statistics are the future of modern baseball and no fan should be in the dark about how these metrics apply to the game In the last twenty years an avalanche of analytics has taken over the way the game is played managed and assessed but the statistics that drive the sport metrics like wRC FIP and WAR just to name a few read like alphabet soup to a large number of fans who still think batting average RBIs and wins are the best barometers for baseball players In A Fan's Guide to Baseball Analytics MLB.com reporter and columnist Anthony Castrovine has taken on the role as explainer to help such fans understand why the old stats don't always add up Readers will also learn where these modern stats came from what they convey and how to use them to evaluate players of the present past and future For instance what if we told you that when Joe DiMaggio had his famous 56 game hitting streak in 1941 helping him win the AL MVP that there was perhaps someone more deserving In fact the great Ted Williams actually had a higher fWAR bWAR wRC OPS OPS ISO RC well you get the picture So streak or no streak Williams should have been league MVP An introductory course on sabermetrics A Fan's Guide to Baseball Analytics is an easily digestible resource that readers can keep turning back to when they see a modern metric referenced in today's baseball coverage **Library/media**

The Complete Idiot's Guide to Journalism Christopher K. Passante, 2007-09-04. Breaking news. This is like having J school in a book. In recent years, news reporting has dramatically changed. While the basic who, what, when, where, and why of journalism is still relevant, aspiring journalists are now asking how. The 21st century of blogs, instant internet access, and 24-hour news shows with minute-by-minute updates has made reporting a whole new and very competitive business. Here a newspaper veteran answers every question about the new world of journalism and explores every possibility for success. Covers TV, radio, magazine, newspaper, e-zine, podcast, and internet reporting. Includes a resource list of media outlets, schools, and university programs. Explores different angles for approaching hard news, entertainment, weather, or sports. *Adweek*, 1999-05.

Practical Principles of Instructional Design, Media Selection, and Interface Design with a Focus on Computer-based Training / Educational Software Peter Fenrich, 2014-03-21. This book is intended for students, instructional designers, professors, instructors, teachers, trainers, software developers, and development team leaders who are taking a course on creating computer-based training educational software applications or who will be working on a computer-based training educational software development team. Need to expand their skills into the multimedia technology field? Are excited about the possibilities of teaching with multimedia? Have worked on their own and unsuccessfully tried to do it all? May have created mediocre computer-based training educational software? Want to do it right the first time? Need a practical reference? Need practical guidelines for creating computer-managed presentations? This book focuses on the practical principles of creating computer-based training educational software applications and computer-managed presentations. In computer-based training educational software applications, the computer assumes the teaching role. In computer-managed presentations, you maintain the responsibility for teaching the learners and use what is contained in the presentation as a resource. In a sense, computer-managed presentations are a subset of computer-based training educational software applications. Their differences will be highlighted throughout this book. This book will not make you an expert in designing computer-based training educational software applications. Expertise comes through years of experience and continual learning. However, this book will provide you with the foundations for creating professional instructionally effective products.

To gain support for your computer based training educational software applications and computer managed presentations and to silence the critics it is important to create excellent products People will notice quality much more than quantity This is especially true for your first project This book with its numerous practical hints will help you do it right from your first project onward *Excel 2013: The Missing Manual* Matthew MacDonald,2013-04-18 The world s most popular spreadsheet program is now more powerful than ever but it s also more complex That s where this Missing Manual comes in With crystal clear explanations and hands on examples Excel 2013 The Missing Manual shows you how to master Excel so you can easily track analyze and chart your data You ll be using new features like PowerPivot and Flash Fill in no time The important stuff you need to know Go from novice to ace Learn how to analyze your data from writing your first formula to charting your results Illustrate trends Discover the clearest way to present your data using Excel s new Quick Analysis feature Broaden your analysis Use pivot tables slicers and timelines to examine your data from different perspectives Import data Pull data from a variety of sources including website data feeds and corporate databases Work from the Web Launch and manage your workbooks on the road using the new Excel Web App Share your worksheets Store Excel files on SkyDrive and collaborate with colleagues on Facebook Twitter and LinkedIn Master the new data model Use PowerPivot to work with millions of rows of data Make calculations Review financial data use math and scientific formulas and perform statistical analyses
