Embargoed Science Vincent Kiernan, 2023-12-11 The popular notion of a lone scientist privately toiling long hours in a laboratory striking upon a great discovery and announcing it to the world is a romanticized fiction Vincent Kiernan's Embargoed Science reveals the true process behind science news an elite few scholarly journals control press coverage through a mechanism known as an embargo The journals distribute advance copies of their articles to hundreds and sometimes thousands of journalists around the world on the condition that journalists agree not to report their stories until a common time several days later When the embargo lifts airwaves and newspaper pages are flooded with stories based on the journal's latest issue In addition to divulging the realities behind this collusive practice Kiernan offers an unprecedented

exploration of the embargo's impact on public and academic knowledge of science and medical issues. He surveys twenty five daily U.S. newspapers and relates his in-depth interviews with reporters to examine the inner workings of the embargo and how it structures our understanding of news about science. Kiernan ultimately argues that this system fosters pack journalism and creates an unhealthy shield against journalistic competition. The result is the uncritical reporting of science and medical news according to the dictates of a few key sources.

E-Health Hiroshi Takeda, 2010-08-23 For the first time in history the International Federation for Information Processing (IFIP) and the International Medical Informatics Association (IMIA) held the joint E-Health Symposium as part of the IT stream of the IFIP World Congress 2010 at Brisbane, Australia, during September 22-23, 2010. IMIA is an independent organization established under Swiss law in 1989. The organization originated in 1967 from Technical Committee 4 of IFIP, that is a non-governmental umbrella organization for national societies working in the field of information processing. It was established in 1960 under the auspices of UNESCO following the First World Computer Congress held in Paris in 1959. Today IFIP has several types of members and maintains friendly connections to specialized agencies of the UN system and non-governmental organizations. Technical work, which is the heart of IFIP's activity, is managed by a series of Technical Committees. Due to strong needs for promoting informatics in healthcare and the rapid progress of information and communication technology, IMIA President Reinhold Haux proposed to strengthen the collaboration with IFIP. The IMIA General Assembly (GA) approved the move and an IMIA Vice President (VP) for special services. Hiroshi Takeda was assigned as a liaison to IFIP at Brisbane during MEDINFO2007, where the 40th birthday of IMIA was celebrated.

Global Health and International Relations Colin McInnes, Kelley Lee, 2013-05-02 The long separation of health and International Relations as distinct academic fields and policy arenas has now dramatically changed. Health, concerned with the body, mind, and spirit, has traditionally focused on disease and infirmity, whilst International Relations has been dominated by concerns of war, peace, and security. Since the 1990s, however, the two fields have increasingly overlapped. How can we explain this shift and what are the implications for the future development of both fields? Colin McInnes and Kelley Lee examine four key intersections between health and International Relations today: foreign policy and health diplomacy; health and the global political economy; global health governance; and global health security. The explosion of interest in these subjects has in large part been due to real-world concerns: disease outbreaks, antibiotic resistance, counterfeit drugs, and other risks to human health amid the spread of globalisation. Yet the authors contend that it is also important to understand how global health has been socially constructed, shaped in theory and practice by particular interests and normative frameworks. This groundbreaking book encourages readers to step back from problem-solving to ask how global health is being problematized in the first place: why certain agendas and issue areas are prioritised and what determines the potential solutions put forth to address them. The palpable struggle to better understand the health risks facing a globalized world and to strengthen collective action to deal with them effectively begins, they argue, with a more

reflexive and critical approach to this rapidly emerging subject MEDINFO 2007 K.A. Kuhn,J.R. Warren,T.-Y.
