

Temperature Log for Refrigerator and Freezer — Fahrenheit

Month/Year: _____ Days 1–15

Completing this temperature log: Check the temperatures in both the freezer and the refrigerator compartments of your vaccine storage units at least twice each working day. Place an "X" in the box that corresponds with the temperature and record the ambient (room) temperature, the time of the temperature readings, and your initials. Once the month has ended, save each month's completed form for 3 years, unless state or local jurisdictions require a longer time period.

If the recorded temperature is in the shaded zone: This represents an unacceptable

temperature range. Follow these steps:

1. Store the vaccine under proper conditions as quickly as possible.
2. Temporarily mark exposed vaccine "do not use" until you have verified whether or not the vaccine may be used.
3. Call the immunization program at your state or local health department and/or the vaccine manufacturer to determine whether the vaccine is still usable: () _____.
4. Document the action taken on the reverse side of this log.
