

MEDICARE MINUTE

- Assessment of improvement, extent of progress (or lack thereof) toward each goal;
- Plans for continuing treatment, reference to additional evaluation results, and/or treatment plan revisions should be documented in the clinician's progress report; and
- Changes to long or short term goals, discharge or an updated plan of care that is sent to the physician/NPP for certification of the next interval of treatment.
- Functional documentation is required as part of the progress report at the end of each progress reporting period. It is also required at the time of discharge on the discharge note or summary, as applicable. The clinician documents, on the applicable dates of service, the specific nonpayable G-codes and severity modifiers used in the required reporting of the patient's functional limitation(s) on the claim for services, including how the modifier selection was made. See subsection C of 220.4 below for details relevant to documentation requirements.

A re-evaluation should not be required before every progress report routinely, but may be appropriate when assessment suggests changes not anticipated in the original plan of care.
