Information Services for a Sustainable Society Madeleine C. Fombad, Collence Takaingenhamo Chisita, Omwoyo Bosire Onyancha, Mabel K. Minishi-Majanja, 2023-07-24 The publication seeks to establish how information professionals are providing information services in a sustainable society in an era of information disorder. It also provides the strategic direction to strengthen the global voice of libraries inspiring and enhancing professional practice as well as enhancing international cooperation and collaboration among LIS educators and practitioners. The contents are divided according to the following key sub themes that resonate with the title as outlined below: Library and information services in the information age; Data and records in an era of information disorder; Archives; data curation and preservation in the digital era; Data science analytics and visualization; Information ethics in the digital era; Information deluge in the digital era; Information and knowledge management; Fourth Industrial revolution. The highlighted themes explore critical issues relating to how libraries, archives and related institutions are responding to the seismic shifts in the information landscape amidst a myriad of challenges and opportunities. The sub themes bring together a tapestry of articles that explore the status, experiences and future prospects of the dynamic library and information science practice. *Transforming Higher Education in Asia and Africa* Fred M. Hayward, 2020-03-01 Analyzes twelve strategic planning efforts in higher education in eight countries in Asia and Africa. Drawing on over fifty years of on-the-ground experience, Fred M. Hayward's *Transforming Higher Education in Asia and Africa* analyzes change processes in higher education in eight Asian and African countries. The twelve cases range from the push to upgrade and transform higher education in Afghanistan in the midst of a war to the successful struggle against apartheid in South African institutions as well as thwarted efforts in Sierra Leone and Madagascar. Providing both practical lessons learned and hope for communities globally, Hayward demonstrates that higher education change and even transformation, which is more fundamental and structural, can occur even in the most difficult environments. Successful transformation requires well-crafted strategic and budget plans with careful implementation, monitoring and effective leadership at multiple levels. Yet also critical are a commitment to human development, a desire for freedom and belief in democracy, and recognition that high quality higher education is essential to national development. This book provides detailed and informative accounts of system transformation, policymaking, leadership and development in several developing countries. These areas are largely neglected in the literature. It also provides an account of the value of coordination and planning in developing effective higher education systems and institutions. It is clear that the author has long experience and expertise in the topics and regions addressed. Brendan Cantwell, Michigan State University.
