1. A practical music examination can be taken once or twice. Those candidates who fail it on the first occasion take it a second time.

For those having their first attempt, 25% pass with distinction and 45% gain an ordinary pass. For those taking the examination for a second time, the corresponding figures are 5% and 70% respectively. The tree diagram below illustrates the situation.

- (i) Find the probability that a randomly chosen candidate
- (A) fails the examination
 - (B) passes the examination (with or without distinction) [4]
- (ii) Given that a randomly chosen candidate passes the examination, find the probability that he or she passes with distinction. [3]
- (iii) Jill and Jo are two randomly chosen entrants for the examination. Find the probabilities that
- (A) both pass (with or without distinction), but just one of them needs a second attempt,
 - (B) Jill gets a better result than Jo. [8]
2. Midchester Rovers and Southpool United are two teams in a football league. Previous experience shows that, when these two teams play each other, the numbers of goals scored are independent and have the following probabilities.
