**Fever of War** Carol R Byerly, 2005-04-05 The influenza epidemic of 1918 killed more people in one year than the Great War killed in four sickening at least one quarter of the world's population In Fever of War Carol R Byerly uncovers the startling impact of the 1918 influenza epidemic on the American army its medical officers and their profession a story which has long been silenced Through medical officers memoirs and diaries official reports scientific articles and other original sources Byerly tells a grave tale about the limits of modern medicine and warfare The tragedy begins with overly confident medical officers who armed with new knowledge and technologies of modern medicine

had an inflated sense of their ability to control disease The conditions of trench warfare on the Western Front soon outflanked medical knowledge by creating an environment where the influenza virus could mutate to a lethal strain This new flu virus soon left medical officers confidence in tatters as thousands of soldiers and trainees died under their care They also were unable to convince the War Department to reduce the crowding of troops aboard ships and in barracks which were providing ideal environments for the epidemic to thrive After the war and given their helplessness to control influenza many medical officers and military leaders began to downplay the epidemic as a significant event for the U S army in effect erasing this dramatic story from the American historical memory

*The Red River Campaign of 1864 and the Loss by the Confederacy of the Civil War* Michael J. Forsyth, 2015-07-11 The Union Army's Red River Campaign began on March 12 1864 with a two pronged attack aimed at gaining control of Shreveport Louisiana It lasted until May 22 1864 when after suffering significant casualties the Union army retreated to Simmesport Louisiana The campaign was an attempt to prevent Confederate alliance with the French in Mexico deny supplies to Confederate forces and secure vast quantities of Louisiana and Texas cotton for Northern mills With this examination of Confederate leadership and how it affected the Red River Campaign the author argues against the standard assumption that the campaign had no major effect on the outcome of the war In fact the South had and lost an excellent opportunity to inflict a decisive defeat that might have changed the course of history With this campaign as an ideal example the politics of military decision making in general are also analyzed

**The Politics of Long Division** Donald John Ratcliffe, 2000 This sequel to Donald J Ratcliffe's *Party Spirit in a Frontier Republic* investigates the origins of the important series of political contests now known as the Second Party System Whereas recent historians claim that the mass parties of the antebellum era emerged in the 1830s Ratcliffe argues that already by 1828 the battle lines had been laid down in Ohio that would dominate local and national politics until the eve of the Civil War and even persist into the twentieth century This cleavage in popular political loyalties first emerged Ratcliffe contends in the wake of the Missouri crests and the Panic of 1819 In 1824 the struggle to control the federal government saw many voters make choices to which they subsequently clung Then in 1828 with the rise of the Jacksonian opposition the excitements of the first closely contested presidential election in Ohio brought unprecedented numbers of voters into the electoral contest The choices that voters made at this critical time reflected in part the energetic organizational work of ambitious politicians and the persuasive scurrility of the media But more significantly it revealed not only the economic hopes and political attachments but also the cultural attitudes ethnic antagonisms and social tensions that divided Ohioans in the much neglected decade of the 1820s
