Groucutt, 2020-07-23 This volume brings together diverse

contributions from leading archaeologists and paleoanthropologists covering various spatial and temporal periods to distinguish convergent evolution from cultural transmission in order to see if we can discover ancient human populations With a focus on lithic technology the book analyzes ancient materials and cultures to systematically explore the theoretical and physical aspects of culture convergence and populations in human evolution and prehistory The book will be of interest to academics students and researchers in archaeology paleoanthropology genetics and paleontology The book begins by addressing early prehistory discussing the convergent evolution of behaviors and the diverse ecological conditions driving the success of different evolutionary paths Chapters discuss these topics and technology in the context of the Lower Paleolithic Earlier Stone age and Middle Paleolithic Middle Stone Age The book then moves towards a focus on the prehistory of our species over the last 40 000 years Topics covered include the human evolutionary and dispersal consequences of the Middle Upper Paleolithic Transition in Western Eurasia Readers will also learn about the cultural

convergences and divergences that occurred during the Terminal Pleistocene and Holocene such as the budding of human societies in the Americas The book concludes by integrating these various perspectives and theories and explores different methods of analysis to link technological developments and cultural convergence *The Urban Ecologies of Divided Cities* Amira Osman, John Nagle, Sabyasachi Tripathi, 2023-06-12 The book discusses how division affects the fabric of cities and people's sense of identity and agency and are reflected in physical features architecture and urban planning The question of divided cities represents a complex and multistranded urban Ecology at once both social and spatial it cannot be limited to a single science or discipline such as social or spatial fields This suggests integrated and cross disciplinary understandings as well as integrated or parallel approaches and solutions Urban ecologies of division manifest in multiple forms One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric Violence in such contexts is often a surface expression of deeper socio economic or ideological differences Whether as a result of intervention by authority or by dissent between groups a divided city inevitably becomes a place of conflict in various forms and intensity eroding the joy of living and sense of collective belonging to the detriment of all In effect it erodes the collective advantage of being part of a more unified society A city exists in collections of social structures which mutually form a society A divided city implies divided social structures and in consequence a divided society The papers compiled in this book present many case studies of divided cities discussing the different causes of divisions and their effects on societies Some of the causes can be linked to conflicts wars colonialism or legislative political systems In response to the serious challenges resulting from these divisions the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions making it significant to urban planners architects and policymakers **Dynamics of Plate**

Tectonics and Mantle Convection Joao C. Duarte, 2023-02-10 Dynamics of Plate Tectonics and Mantle Convection written by specialists in the field gathers state of the art perspectives on the dynamics of plate tectonics and mantle convection Plate tectonics is a unifying theory of solid Earth sciences In its initial form it was a kinematic theory that described how the planet's surface is fragmented into several rigid lithospheric plates that move in relation to each other over the less viscous asthenosphere Plate tectonics soon evolved to describe the forces that drive and resist plate movements The Earth sciences community is now developing a new perspective that looks at plate tectonics and mantle convection as part of a single system Why does our planet have plate tectonics and how does it work How does mantle convection drive the supercontinent cycle How have tectono convective modes evolved over the Earth's history How did they shape the planet and impact life Do other planets have mantle convection and tectonics These are some of the fascinating questions explored in this book This book started with a challenge from the editor to the authors to provide perspectives from their vantage point and open the curtain to the endeavors and stories behind the science Provides diverse perspectives from different experts around the world in plate tectonics and geodynamics Includes the most up to date knowledge on plate tectonics and mantle convection Sets the

scene for the developments and challenges likely to be faced by researchers in the future of geodynamics

Encyclopedia of Information Science and Technology, Fifth Edition Khosrow-Pour D.B.A., Mehdi, 2020-07-24 The rise of intelligence and computation within technology has created an eruption of potential applications in numerous professional industries. Politics and Governance of Basic Education Brian Levy, Robert Cameron, Ursula Hoadley, Vinodhan Naidoo, 2018-09-21 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. All over the world, economic inclusion has risen to the top of the development discourse. A well performing education system is central to achieving inclusive development, but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased, but quality remains low, with weaknesses in governance comprising an important part of the explanation. The Politics and Governance of Basic Education explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from

apartheid to democracy it explores how the interaction of politics and institutions affects educational outcomes By examining lessons learned from how South Africa failed to achieve many of its goals it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re orient the system towards learning

Transboundary Water Politics in the Developing World Naho Mirumachi, 2015-03-05 This book examines the political economy that governs the management of international transboundary river basins in the developing world These

shared rivers are the setting for irrigation hydropower and flood management projects as well as water transfer schemes. Often these projects attempt to engineer the river basin with deep political, socio-economic and environmental implications. The politics of transboundary river basin management sheds light on the challenges concerning sustainable development, water allocation and utilization between sovereign states. Advancing conceptual thinking beyond simplistic analyses of river basins in conflict or cooperation, the author proposes a new analytical framework. The Transboundary Waters Interaction Nexus TWINS examines the coexistence of conflict and cooperation in riparian interaction. This framework highlights the importance of power relations between basin states that determine negotiation processes and institutions of water resources management. The analysis illustrates the way river basin management is framed by powerful elite decision makers combined with geopolitical factors and geographical imaginations. In addition, the book explains how national development strategies and water resources demands have a significant role in shaping the intensities of conflict and cooperation at the international level. The book draws on detailed case studies from the Ganges River basin in South Asia, the Orange Senqu River basin in Southern Africa and the Mekong River basin in Southeast Asia, providing key insights on equity and power asymmetry applicable to other basins in the developing world. *Adoption and impact of OER in the Global South* Cheryl

Hodgkinson-Williams, Brazil Arinto, 2017-12-29 Education in the Global South faces several key interrelated challenges for which Open Educational Resources (OER) are seen to be part of the solution. These challenges include unequal access to education, variable quality of educational resources, teaching and student performance, and increasing cost and concern about the sustainability of education. The Research on Open Educational Resources for Development (ROER4D) project seeks to build on and contribute to the body of research on how OER can help to improve access, enhance quality, and reduce the cost of education in the Global South. This volume examines aspects of educator and student adoption of OER and engagement in Open Educational Practices (OEP) in secondary and tertiary education, as well as teacher professional development in 21 countries in South America, Sub-Saharan Africa, and South and Southeast Asia. The ROER4D studies and syntheses presented here aim to help inform Open Education advocacy, policy, practice, and research in developing countries. **Impact of Water**

Pollution on Human Health and Environmental Sustainability McKeown, A. Elaine, 2015-10-27 Water is at the core of all life on Earth and exists as one of the main components of the human body. Because water is essential to life, addressing water pollution and sustainability issues is of great concern to environmentalists and public health specialists alike. *Impact of Water Pollution on Human Health and Environmental Sustainability* highlights several important water-related issues and explores a number of potential solutions to the problem of water sustainability. Focusing on research-based perspectives on water availability, industrial and agricultural pollution, water contamination, and their impacts on the human population as well as the environment, this crucial publication is a necessary addition to academic and government libraries serving graduate-level students, environmental scientists, public health workers, policy makers, and legislators seeking the latest

information on sustainable and contaminant free water resources

Increasing Resilience and Adaptability to Climate Change of Vulnerable Groups in Agriculture Seth Etuah, Faizal Adams, Zhen Liu, James Osei Mensah, Jing Lan, 2024-12-04

Climate change remains a global challenge due to the livelihood threat it poses particularly to the marginalized or vulnerable groups in society Though developing countries contribute the least to the cause of climate change they remain the most vulnerable to its effects This vulnerability is due to the over reliance of the population on rain fed agriculture as the main livelihood source These mainly smallholder farmers lack institutional technological infrastructural and economic capabilities to adapt to climate change In addition to this there are wide disparities in the allocation of key sustainable livelihood assets e.g land livestock farm equipment etc among men women and youth For instance women often have limited access to land financial services social capital technology labour education and other opportunities mainly due to traditional cultural sex divisions within the domestic realm Moreover the majority of the resource poor youth are employed in the agricultural sector rendering them

more vulnerable to climate uncertainties The impact of climate change on these groups men women youth and smallholders is expected to be different Studies that fail to acknowledge these differences and focus only on geographical location could be misleading Recent climate change scenarios indicate substantial reductions in the yield of staple foods linked to drought high temperature and rainfall variability with a projected overall decline in revenue from agriculture These projected negative impacts would directly influence food security and render millions of households undernourished According to the Food and Agriculture Organization FAO of the United Nations between 720 and 828 million people across the globe are already experiencing chronic hunger Additionally about 161 million children below five years of age are stunted
