Reach Higher Initiative Better Make Room 2019 Educational attainment e.g. a high school diploma college degree or postsecondary training provides career opportunities for advancement into leadership positions and benefits such as health insurance and retirement. Heckman 2000. Additionally an individual with a college degree can make over one million dollars more over a lifetime in salary than someone with a high school diploma. Carnevale Cheah Hanson 2015. Acquiring a college degree can lead to employment opportunities and is considered an asset in the U.S. economy. Washington 2010. However certain populations encounter barriers to attaining an education particularly a postsecondary education leading to a disparity in receiving the aforementioned benefits. Some of these populations include African American students LGBTQ students and students with disabilities. Eliason, John Patrick, 2008-10-01 Career Development in the Schools describes a dynamic process that continues to evolve in its rationale and practice In many schools and in a variety of scholarly writings the status of career development is controversial Some observers assert that career development should be seen as a by product of all of the knowledge and activities that are incorporated in the educational experience In this view career development tends to be seen as a random process that happens in a natural almost magical way without specific direction or structured form However most career theorists would argue that the career development of students should be a major mission of the school a process too important to be only a by product of scattered learning and activities that are inherently uneven from student to student The prevailing contemporary perspective contends that career development in the schools should be planned have its own content derived from research and theory be systematically executed and use methods that are relevant to the developmental levels of students throughout elementary middle and senior high schools To further such ends several national models of content and practice have been formulated by the American School Counselor Association the National Career Development Revised Guidance Project and by other organizations to identify the components competencies and outcomes that students of different ages and aspirations need to acquire as they grow in maturity Several of these models are discussed at length in the various chapters of this book

Post-Secondary Planning for All Sejal Parikh Foxx, J. Anthony Elizondo, 2023-08-01 It is not surprising that in order to meet the job demands of the future we need to ensure that students have the knowledge and opportunity to choose from an array of postsecondary options before graduating from high school Particularly as our society continues to increase in diversity providing access to college and career choices for all students is imperative However there are many barriers that keep students from reaching their

potential and envisioning a future that is personally and professionally rewarding. Many of these barriers are systemic in nature and others are related to individual circumstances. Regardless of where the barriers stem from, school counselors and others who provide postsecondary readiness services to students must advocate work to create equitable access and assist with navigating through complex systems. This book compiles information and strategies from experts in the field. Each chapter in this book offers definitions of specific populations, evidence-based, culturally responsive counseling strategies including those related to collaboration, case studies, and interventions, and opportunities for readers to reflect on their understanding of that population to inspire professional growth. Groups included in this book include students who are experiencing homelessness, students in English Language Learner programs, families experiencing poverty, students with special needs, and many others that school counselors and college advisors will encounter in their career.
