**Evaluating School Programs** James R. Sanders, Carolyn D. Sullins, 2005-11-28 Achieve lasting educational benefits through masterfully administered school program evaluations The annual process of evaluating school programs raises a legitimate question how

to implement quality program evaluations that will not drain a school's resources but instead help create a school culture that promotes inspired teaching and high academic achievement and meets NCLB guidelines. In this updated edition of the bestselling text, authors James R. Sanders and Carolyn D. Sullins demonstrate how an effective program evaluation process can conserve resources while yielding substantial benefits for teachers, parents, students, and schools. This user-friendly resource provides concise yet comprehensive coverage of school program evaluation through a highly regarded five-step program. Illustrated by examples and case studies, this approach is designed to help educators develop competence and confidence in program evaluation. Both practicing and aspiring educators can learn to successfully manage logistical and scheduling problems, strategically approach school politics, ethical considerations, and interpersonal relations. Comprehensively organize and analyze information regarding school programs. Effectively respond to the No Child Left Behind Act. Discover how to skillfully administer school evaluations that produce lasting educational results.

**Topics and Trends in Current Science Education** Catherine Bruguière, Andrée Tiberghien, Pierre Clément, 2013-11-19. This book features 35 of the best papers from the 9th European Science Education Research Association Conference (ESERA) 2011 held in Lyon, France, September 5th-9th, 2011. The ESERA international conference featured some 1,200 participants from Africa, Asia, Australia, Europe, as well as North and South America, offering insight into the field at the end of the first decade of the 21st century. This book presents studies that represent the current orientations of research in science education and includes studies in different educational traditions from around the world. It is organized into six parts around the three poles: content, students, teachers, and their interrelations of science education. After a general presentation of the volume, the first part is the second part, which concerns SSI (Socio-Scientific Issues) dealing with new types of content; the third, the teachers; the fourth, the students; the fifth, the relationships between teaching and learning; and the sixth, the teaching resources and the curricula.

**Digital Literacy Made Simple** Jenna Kammer, Lauren Hays, 2023. Digital literacy describes skills and ways of thinking related to the use of technology, including the technical competence to communicate, evaluate, and interpret digital information, navigate websites, and understand why all these skills are important. All students need these skills to be responsible participants in school and society. However, teaching digital literacy can be challenging for teachers who have many other content standards they must address. In this book, two innovative educators demonstrate how to weave digital literacy skills throughout instruction in small ways with simple strategies to discuss, model, mentor, build a learning culture, and create digital experiences to improve students' digital literacy skills and habits. Through the use of practical examples that all teachers can implement immediately, this book is a useful guide for any teacher working to encourage digital literacy in their students.
