

Flex Circuit

The MX300 Series radios use a flex circuit rather than conventional wire harnessing. • This durable, thin plastic film eliminates broken, pinched or frayed wires, and permits a neat, easy-to-service radio.

Multi-Layer Printed Circuit Board

The all new multi-layer printed circuit board contains copper circuit paths on inner layers of the board, as well as the outside. • This minimizes circuit crossings and better separates conducting paths. This efficient packaging method allows single-layer radio construction which permits the service technician to have access to all modules without removing the board from the radio frame.

Five Radio Sizes

MX320-360 Series radios can be obtained in any of five different housing sizes. • These housings are designed to accommodate any option, number of frequencies (up to eight), or power level you may need. A sixth unit, the smallest and lightest portable radio offered, is the MX310 Model HANDIE-TALKIE radio (see catalog sheet R3-4-50).

One Radio Does It All

• There is no need to have a special radio for every application, since one MX300 Series radio provides you with all possible model configurations; Converta-Com, universal

models and accessories for public safety model applications.

Accessory Connectors

An external antenna connector and an external options connector are available on all MX320-360 Series radios. • Located on the side, the external options connector accepts remote and public safety speaker/microphones with a simple plug-in procedure or allows for interfacing with the CONVERTA-COM mobile radio console. This connector is also designed to be used with a test set for fast, easy servicing.

Easy to Operate Controls

• Low profile rotary knobs are provided for frequency selection and on-off volume control. They are conveniently placed so that the user may operate the radio under all environmental conditions. A two-position toggle switch controls the Private-Line squelch. These controls and the speaker/headphone jack and LED battery status indicator are all on the top control panel. A weathersealed bootied push-to-talk switch, accessory connector and antenna jack are located on the side.
