Communication Justine Humphry, 2022-10-20 This book examines how mobile phones and the internet have become a vital part of the everyday lives of people experiencing homelessness. But the access mobile phones provide is costly, insecure, and limited, producing an experience of being precariously connected. Drawing on findings of research conducted with over one hundred young people, families, and adults experiencing homelessness in Australia and the United States, this book analyses homelessness as a mediated condition and explores the underpinning processes that shape digital disparities. It contributes to scholarship on mobile communication and inequality, highlighting the digital patterns, issues, and difficulties of a group disproportionately affected by service reform and developments in digital citizenship, smart cities, and algorithmic governance.

The SAGE Handbook of Media and Migration Kevin Smets, Koen Leurs, Myria Georgiou, Saskia Witteborn, Radhika Gajjala, 2019-10-31 Migration moves people, ideas, and things. Migration shakes up political scenes and instigates new social movements. It redraws emotional landscapes and reshapes social networks with traditional and digital media, enabling representing and shaping the processes, relationships, and people on the move. The deep entanglement of media and migration expands across the fields of political, cultural, and social life. For example, migration is increasingly digitally tracked and surveilled, and national and international policy making draws on data on migrant movement, anticipated movement, and biometrics to maintain a sense of control over the mobilities of humans and things. Also, social imaginaries are constituted in

highly mediated environments where information and emotions on migration are constantly shared on social and traditional media Both those migrating and those receiving them turn to media and communicative practices to learn how to make sense of migration and to manage fears and desires associated with cross border mobility in an increasingly porous but also controlled and divided world The SAGE Handbook of Media and Migration offers a comprehensive overview of media and migration through new research as well as a review of present scholarship in this expanding and promising field It explores key interdisciplinary concepts and methodologies and how these are challenged by new realities and the links between contemporary migration patterns and its use of mediated processes Although primarily grounded in media and communication studies the Handbook builds on research in the fields of sociology anthropology political science urban studies science and technology studies human rights development studies and gender and sexuality studies to bring to the forefront key theories concepts and methodological approaches to the study of the movement of people In seven parts the Handbook dissects important areas of cross disciplinary and generational discourse for graduate students early career researcher migration management practitioners and academics in the fields of media and migration studies international development communication studies and the wider social science discipline Part One Keywords and Legacies Part Two Methodologies Part Three Communities Part Four Representations Part Five Borders and Rights Part Six Spatialities Part Seven Conflicts
