**Teaching and Learning about Science** Derek Hodson, 2009-01-01 Findings generated by recent research in science education international debate on the guiding purposes of science education and the nature of scientific and technological literacy official and semi official reports on science education including recommendations from prestigious organizations such as AAAS and UNESCO and concerns expressed by scientists environmentalists and engineers about current science education provision and the continuing low levels of scientific attainment among the general population have led to some radical re thinking of the nature of the science curriculum There has been a marked shift of rhetorical emphasis in the direction of considerations of the nature of science model based reasoning inquiry based learning scientific argumentation and the use of language rich learning experiences reading writing talking to enhance concept acquisition and development These findings arguments and pronouncements seem to point very clearly in the direction of regarding science education as a study of scientific practice This book presents a comprehensive research based account of how such a vision could be assembled into a coherent curriculum and presented to students in ways that are meaningful motivating and successful The author takes what might be described as an anthropological approach in which scientists are studied as a socially economically and politically important community of people This group has its own distinctive language body of knowledge investigative methods history traditions norms and values each of which can be studied explicitly systematically and reflectively This particular approach was chosen for the powerful theoretical overview it provides and for its motivational value especially for students from sociocultural groups currently under served by science education and under represented in

science The book which is both timely and important is written for teachers student teachers graduate students in education teacher educators curriculum developers and those responsible for educational policy It has the potential to impact very substantially on both pre service and inservice science teacher education programmes and to shift school science education practice strongly in the direction currently being advocated by prominent science educators Teaching the Male Brain Abigail Norfleet James,2015-02-18 Unlock the potential of every boy No you re not imagining it boys really do learn differently from girls When you discover how to reach them you can help them succeed beyond anyone s expectations even their own Updated with the latest research in neuroscience and developmental psychology this bestselling guide translates theory into tested and refined strategies that are practical and ready to be put to work immediately Features include A discussion of cognitive gender differences and how they relate to learning An analysis of the benefits and challenges of single sex classrooms Tried and true techniques for differentiating learning in co ed classroom Cutting edge strategies for reaching boys with ADHD learning disabilities social and emotional differences and more Detailed case studies and real life dilemmas The boys in your class are counting on you Keep them in the game and lead them to success with this must have resource This book is a practical resource for the classroom teacher It provides teachers with a plethora of engaging and promising practices and tools to motivate and encourage students to perform at or above their potentiality level Shelia Gorham Principal Allen Middle School Greensboro NC Teaching the Male Brain Second Edition is a holistic tool for educators parents and individuals committed to effectively understand teach support and guide the development of young men in their care Dr James provides a clear lens into the intricate details of the thoughts and actions of the boys in our lives Nakia Douglas Principal Barack Obama Male Leadership Academy Dallas TX *Science As Inquiry* Jack Hassard,2011-03 Aligns to Common Core state standards Cover Basic and applied research on deception and its detection Wolfgang Ambach,Matthias Gamer,2014-08-07 Deception is a ubiquitous phenomenon in social interactions and has attracted a significant amount of research during the last decades The majority of studies in this field focused on how deception modulates behavioral autonomic and brain responses and whether these changes can be used to validly identify lies Especially the latter question which historically gave rise to the development of psychophysiological lie detection techniques has been driving research on deception and its detection until today The detection of deception and concealed information in forensic examinations currently constitutes one of the most frequent applications of psychophysiological methods in the field With the increasing use of such methods the techniques for detecting deception have been controversially discussed in the scientific community It has been proposed to shift from the original idea of detecting deception per se to a more indirect approach that allows for determining whether a suspect has specific knowledge of crime related details This so called Concealed Information Test is strongly linked to basic psychological concepts concerning memory attention orienting and response monitoring Although research in this field has intensified with the advancement of neuroimaging techniques such

as PET and fMRI in the last decade basic questions on the psychological mechanisms underlying modulatory effects of deception and information concealment on behavioral autonomic and brain responses are still poorly understood This Research Topic brings together contributions from researchers in experimental psychology psychophysiology and neuroscience focusing on the understanding of the broad concept of deception including the detection of concealed information with respect to basic research questions as well as applied issues This Research Topic is mainly composed of original research articles but reviews and papers elaborating on novel methodological approaches have also been included Experimental methods include but are not limited to behavioral autonomic electroencephalographic or brain imaging techniques that allow for revealing relevant facets of deception on a multimodal level While this Research Topic primarily includes laboratory work relevant issues for the field use of such methods are also discussed *Qualitative Inquiry in Geoscience Education Research* Anthony D. **Secondary Analysis of the TIMSS Data** David F. Robitaille, Albert E. Beaton, 2005-12-19 Researchers who participate in IEA studies have a unique opportunity to work collaboratively with their counterparts from many different countries and disciplinary backgrounds over a period of several years on questions of shared academic interest Once the data for a given study have been collected and the first round of international reports published however opportunities for that kind of collaboration tend to be much less frequent A major strength of IEA studies compared to other large scale international studies is that they are classroom based thereby making it possible for researchers and policy makers to investigate linkages between students achievement and a wide range of variables Those variables could be related to instructional practices to students and teachers background and attitudes to school organizational patterns or to opportunity to learn to name a few The research questions that TIMSS was designed to address make it clear that these kinds of relational multi variate analyses were among the major goals of the project The international reports of the TIMSS 95 results that were published by the International Study Center at Boston College between 1996 and 1999 were intended to provide comprehensive coverage of the basic findings of the study They were not intended to provide in depth analyses of research and policy issues instead their main purpose was to make the basic findings of the study widely available in a timely manner This they certainly did **Current Index to Journals in Education** ,2001
