Advanced Modeling with the MATLAB Reservoir Simulation Toolbox Knut-Andreas Lie, Olav Møyner, 2021-11-25
Many leading experts contribute to this follow up to An Introduction to Reservoir Simulation using MATLAB GNU Octave User Guide for the MATLAB Reservoir Simulation Toolbox MRST It introduces more advanced functionality that has been recently added to the open source MRST software It is however a self contained introduction to a variety of modern numerical methods for simulating multiphase flow in porous media with applications to geothermal energy chemical enhanced oil recovery EOR flow in fractured and unconventional reservoirs and in the unsaturated zone The reader will learn how to implement new models and algorithms in a robust efficient manner A large number of numerical examples are included all fully equipped with code and data so that the reader can reproduce the results and use them as a starting point for their own work Like the original textbook this book will prove invaluable for researchers professionals and advanced students using reservoir simulation methods This title is available as Open Access on Cambridge Core [Enhanced Oil Recovery Field Case Studies](#) James J. Sheng, 2013-04-10 Enhanced Oil Recovery Field Case Studies bridges the gap between theory and practice in a range of real world EOR settings Areas covered include steam and polymer flooding use of foam in situ combustion microorganisms smart water based EOR in carbonates and sandstones and many more Oil industry professionals know that the key to a successful enhanced oil recovery project lies in anticipating the differences between plans and the realities found in the field This book aids that effort providing valuable case studies from more than 250 EOR pilot and field applications in a variety of oil fields The case studies cover practical problems underlying theoretical and modeling methods operational parameters solutions and sensitivity studies and performance optimization strategies benefitting academicians and oil company practitioners alike Strikes an ideal balance between theory and practice Focuses on practical problems underlying theoretical and modeling methods and operational parameters Designed for technical professionals covering the fundamental as well as the advanced aspects of EOR *Science of Carbon Storage in Deep Saline Formations* Pania Newell, Anastasia Ilgen, 2018-09-06 Science of Carbon Storage in Deep Saline Formations Process Coupling across Time and Spatial Scales summarizes state of the art research emphasizing how the coupling of physical and chemical processes as subsurface systems re equilibrate during and after the injection of CO₂ In addition it addresses in an easy to follow way the lack of knowledge in understanding the coupled processes related to fluid flow geomechanics and geochemistry over time and spatial scales The book uniquely highlights process coupling and process interplay across time and spatial scales that are relevant to geological carbon storage Includes the underlying scientific research as well as the risks associated with geological carbon storage Covers the topic of geological carbon storage from various disciplines addressing the multi scale and multi physics aspects of geological carbon storage Organized by discipline for ease of navigation [Production Technology for Deep Reservoirs](#) Yan Peng, Yishan Liu, Hongyan Qu, Feng Dong, Jiehao

Wang,2024-11-28 Underground energy is important for the whole society development but conventional underground energy is becoming exhausted The energy for deep reservoirs usually 3500m for petroleum engineering 1000m for mining engineering is diverse including not limited shale gas oil tight gas oil hot dry rock geothermal reservoirs and coal gasification Although it has abundant reserves the energy production from deep reservoirs is difficult in stimulations because the geological conditions for those deep reservoirs are tougher than those for conventional reservoirs such as high in situ stress obvious heterogeneity in rock properties and complex natural fracture networks Meanwhile common technologies also have environmental impacts The development trend of production technology for deep reservoirs requires it to be environment friendly or decrease environmental impacts at least CO2 utilization may achieve this environmental aim In order to efficiently produce energy from deep reservoirs technological innovation is booming around North America Europe and Asia
