Handbook of Research on Transformative and Innovative Pedagogies in Education Keengwe, Jared,2022-05-13 Various pedagogies such as the use of digital learning in education have been used and researched for decades but many schools have little to show for these initiatives This contrasts starkly with technology supported initiatives in other fields such as business and healthcare Traditional pedagogies and general digital technology applications have yet to impact education in a significant way that transforms learning A primary reason for this minimal impact on learning is that digital technologies have attempted to make traditional instructional processes more efficient rather than using a more appropriate paradigm for learning As such it is important to look at digital technology as a partner and use transformative applications to become partners with students not teachers to empower their learning process both in and out of school The Handbook of Research

on Transformative and Innovative Pedagogies in Education is a comprehensive reference that identifies and justifies the paradigm of transformative learning and pedagogies in education. It provides exemplars of existing transformative applications that if used as partners to empower student learning have the potential to dramatically engage students in a type of learning that better fits 21st century learners. Covering topics such as gamification, project based learning and professional development, this major reference work is an essential resource for pre-service and in-service teachers, educational technologists, instructional designers, educational administration and faculty researchers and academicians seeking pedagogical models that inspire students to learn meaningfully.

Zama: General Pedagogy, 2023-04-13

General Pedagogy: A Guide to Effective Teaching demystifies the scientific art of teaching by providing facts, principles and concrete examples in real life situations such that neither the novice teacher who peruses it will stutter in front of students on the first day of school nor will the experienced teacher write and execute the same old lesson plans on that day. The best teachers are those who show you where to look but don't tell you what to see. This is a popular quote attributed to Alexandra K. Trenfor which aptly summarises the kind of teachers this book intends to produce when used as a teacher training resource. Real teachers facilitate learning; they do not simply tell learners the answers to their questions and concerns. Accordingly, the authors take the readers through well researched themes in the academic discipline of teaching wherein they present, analyse and discuss pertinent issues. Although they provide useful suggestions for teaching success, the authors encourage teachers to interpret facts, ideas and suggestions presented against the sociocultural contexts of their practice. The materials are presented creatively while adding a personal touch intended to facilitate effective and efficient learning.

Contemporary Foundations for Teaching English as an Additional Language Polina Vinogradova, Joan Kang Shin, 2020-10-29

This engaging volume on English as an Additional Language (EAL) argues persuasively for the importance of critical participatory pedagogies that embrace multilingualism and multimodality in the field of TESOL. It highlights the role of the TESOL profession in teaching for social justice and advocacy and explores how critical participatory pedagogies translate into English language teaching and teacher education around the world. Bringing together diverse scholars in the field and practicing English language teachers, editors Polina Vinogradova and Joan Kang Shin present 10 thematically organized units that demonstrate that language teaching pedagogy must be embedded in the larger sociocultural contexts of teaching and learning to be successful. Each unit covers one pedagogical approach and includes three case studies to illustrate how English language teachers across the world implement these approaches in their classrooms. The chapters are supplemented by discussion questions and a range of practical sources for further exploration. Addressing established and emerging areas of TESOL, topics covered include Critical and postmethod pedagogies, Translingualism, Digital literacy and multiliteracies, Culturally responsive pedagogy, Advocacy. Featuring educators implementing innovative approaches in primary, secondary and tertiary contexts across borders.
