Epistemological Problems of Economics Ludwig Mises,2003

Research in the History of Economic Thought and Methodology (Part A, B & C) Warren J. Samuels,Jeff E. Biddle,Ross B. Emmett,2008-06-16 A collection of refereed articles on topics in economic methodology and the history of economics including Austrian economic methodology and Wesley Mitchell

Towards a Theoretical Framework for British and International Economic History Sudha Shenoy,2010

Big Players and the Economic Theory of Expectations R. Koppl,2002-06-19 Investment and all other economic actions depend on subjective expectations The problem is how to construct a theory of expectations that assumes people interpret their situations in unpredictable ways Building on the evolutionary economics of F A Hayek Koppl gives us such a theory This includes a theory of Big Players demonstrating that discretionary policy interventions create ignorance and uncertainty The volume uses innovative methods to address many vital problems in economic theory and connects with many other schools of economics including New Institutional Economics Constitutional Economics and Post Walsarian Economics

Hayek's Political Theory, Epistemology, and Economics

Jeffrey Friedman,2016-04-14 Hayek thought that all economic behavior and by implication other human behavior is based on fallible interpretations of what information is important and of its implications for the future This epistemological idea animated not only his heterodox economic thought but his ideal of the rule of law his road to serfdom thesis and his critique of the notion of social justice However the epistemological idea is a protean one that Hayek did not always handle carefully This volume presents one of the most sophisticated critical reflections on Hayek ever assembled between two covers This book was originally published as a special issue of Critical Review

Max Weber and the Idea of Economic Sociology

Richard Swedberg, 1998 While most people are familiar with The Protestant Ethic and the Spirit of Capitalism few know that during the last decade of his life Max Weber 1864 1920 also tried to develop a new way of analyzing economic phenomena which he termed economic sociology Indeed this effort occupies the central place in Weber's thought during the years just before his death Richard Swedberg here offers a critical presentation and the first major study of this fascinating part of Weber's work Swedberg furthermore discusses similarities and differences between Weber's economic sociology and present day thinking on the same topic In addition the author shows how economic sociology has recently gained greater credibility as economists and sociologists have begun to collaborate in studying problems of organizations political structures social problems and economic culture more generally Swedberg's book will be sure to further this new cooperation

Epistemological Problems of Economics; Translated by George Reisman Ludwig Von Mises, *On Classical Liberalism and Libertarianism* Norman Barry, 1987-07-14 This first systematic analysis of the full range of classical liberal thinking covers the utilitarianism of Hume Smith and their successors the Austrian and Chicago schools of political economy contractarian liberalism and the ethical individualism of Ayn Rand and Robert Nozick Norman Barry also discusses the hitherto barely understood theory of anarcho capitalism and throughout his analysis draws attention to the differences in fundamental philosophical outlook that underline superficially similar policy positions **Quotable Mises, The**, 2005

Mises: The Last Knight of Liberalism Jörg Guido Hülsmann, 2007 **Economics and Ethics of Private Property** Hans-Hermann Hoppe, 2006 The Mises Reader Unabridged Shawn Ritenour, 2016-12-15 *Philosophy of Economics* W. Balzer, Bert Hamminga, 2012-12-06 The last decade witnessed an unprecedented annual growth of the literature dealing with the philosophy of economics as well as the first signs of an institutionalization conferences an international journal of the philosophy of economics as a scientific subject in itself in particular in the U S In 1981 a meeting took place with participants mainly of European continental origin In July 1987 we organized a second conference Philosophy of Economics II at Tilburg University The Netherlands mainly aiming at the establishment of first contacts between the middle European group and researchers from the U S The present volume contains the papers presented at this conference Philosophical thought on economics in recent years split up in many different streams two of which are represented in the larger part of this volume The first of these streams was formed by a group of researchers mainly from middle Europe who make empirical studies of the logical structures of the different theories as they find them presented in economic literature Two methods prevail here First the structuralist method as exemplified in the writings of Sneed Stegmüller and others of describing the object of a theory as a set of partial potential models Such models consist of sets and relationships between these sets which represent the concepts used in the theory **Economic Science and the Austrian Method** Hans-Hermann Hoppe, 1995

Measuring Utility Ivan Moscatti, 2019 Utility is a key concept in the economics of individual decision making However utility is not measurable in a straightforward way As a result from the very beginning there has been debates about the

meaning of utility as well as how to measure it This book is an innovative investigation of how these arguments changed over time Measuring Utility reconstructs economists ideas and discussions about utility measurement from 1870 to 1985 as well as their attempts to measure utility empirically The book brings into focus the interplay between the evolution of utility analysis economists ideas about utility measurement and their conception of what measurement in general means It also explores the relationships between the history of utility measurement in economics the history of the measurement of sensations in psychology and the history of measurement theory in general Finally the book discusses some methodological problems related to utility measurement such as the epistemological status of the utility concept and its measures The first part covers the period 1870 1910 and discusses the issue of utility measurement in the theories of Jevons Menger Walras and other early utility theorists Part II deals with the emergence of the notions of ordinal and cardinal utility during the period 1900 1945 and discusses two early attempts to give an empirical content to the notion of utility Part III focuses on the 1945 1955 debate on utility measurement that was originated by von Neumann and Morgenstern s expected utility theory EUT Part IV reconstructs the experimental attempts to measure the utility of money between 1950 and 1985 within the framework provided by EUT This historical and epistemological overview provides keen insights into current debates about rational choice theory and behavioral economics in the theory of individual decision making and the philosophy of economics

Whispering the Strategies of Language: An Mental Journey through **Epistemological Problems Of Economics**

In a digitally-driven earth wherever monitors reign great and instant conversation drowns out the subtleties of language, the profound techniques and emotional nuances hidden within phrases often move unheard.
