In-flight Separation of Right Wing, Flying Boat, Inc. (doing Business as Chalk's Ocean Airways) Flight 101, Grumman Turbo Mallard (G-73T), N2969, Port of Miami, December 19, 2005 United States. National Transportation Safety Board, 2007 On December 19 2005 about 1439 eastern standard time a Grumman Turbo Mallard G 73T amphibious airplane N2969 operated by Flying Boat Inc doing business as Chalk's Ocean Airways flight 101 crashed into a shipping channel adjacent to the Port of Miami Florida shortly after takeoff from the Miami Seaplane Base Flight 101 was a regularly scheduled passenger flight to Bimini Bahamas with 2 flight crewmembers and 18 passengers on board The airplane's right wing separated during flight All 20 people aboard the airplane were killed and the airplane was destroyed by impact forces

Flight 101 was operating under the provisions of 14 Code of Federal Regulations Part 121 on a visual flight rules flight plan. Visual meteorological conditions prevailed at the time of the accident. The National Transportation Safety Board determines that the probable cause of this accident was the in-flight failure and separation of the right wing during normal flight, which resulted from 1) the failure of the Chalk's Ocean Airways maintenance program to identify and properly repair fatigue cracks in the right wing and 2) the failure of the Federal Aviation Administration (FAA) to detect and correct deficiencies in the company's maintenance program.
