Practice of Secured Transactions: Working With Article 9 Richard F. Duncan, William H. Lyons, Catherine Lee Wilson, 2011 Procedure and Evidence in International Arbitration Jeffrey Waincymer, 2012-05-23 Central to the book's purpose is the procedural challenge facing arbitrators at each and every stage of the arbitral process when fairness arguments conflict with efficiency concerns and trade offs must be determined Some key themes include how can a tribunal be fair and in particular be neutral if parties are so diverse How can arbitration be made efficient and cost effective without undue inroads into fairness and accuracy How does a tribunal do what is best if the parties are choosing a suboptimal process When can or must an arbitrator ignore procedural choices made by the parties The author thoroughly evaluates

competing arguments and adds his own practical tips expertly synthesizing and engaging with the conference literature and differing authors views He identifies criteria that offer a harmonized approach to each stage of the arbitral process with particular attention to such aspects of international arbitration as appropriate trade offs between flexibility and certainty the rights duties and powers of arbitrators appointment and challenge of arbitrators responses to guerilla tactics drafting of arbitration agreements including specialty clauses drafting of required commencement notices and response documents set off fast track arbitration and other efficiency options strategic use of preliminary conferences and timetabling online arbitration multi party multi contract class arbitration amicus and third party funders pre arbitral referees and interim relief witness evidence both factual and expert documentary evidence production obligations and challenges to production identifying applicable law and remedies and costs

Private International Law and Competition Litigation in a Global Context Mihail Danov, 2023-09-21 This important book systematically analyses the private international law issues regarding private antitrust damages claims which arise out of transnational competition law infringements It identifies those problems that need to be considered by injured parties defendants judges and policy makers when dealing with cross border private antitrust damages claims in a global context It considers the post Brexit landscape and the implications in cross border private proceedings before the English courts and suggests how the legal landscape should be developed It also sets out how private international law techniques could play an increasingly important role in private antitrust enforcement Comprehensive and rigorous this is required reading for scholars of both competition litigation and private international law

Understanding the Law of Assignment C. H. Tham, 2019-10-17 Explains how intangible assets such as contractual debts or equitable entitlements may be assigned under English law **CISG Methodology** André Janssen, Olaf Meyer, 2009-04-27 The CISG is now being applied extensively both by international arbitral tribunals and by domestic courts of its more than 70 contracting states But do they also apply it in the same manner Although Article 7 of the CISG underscores the need to promote uniformity in its application it gives little guidance as to how to achieve this goal Each judge and arbitrator is influenced by the legal methodology of his home jurisdiction Therefore it is somewhat of a paradox that whilst the number of contracting states is constantly increasing so too is the threat of variation in application In this book the most important issues of the CISG s methodology are analysed by leading experts from five continents Whereas some authors provide a thorough analysis of the central topics of interpretation others enter almost uncharted territories

International Contracting Larry A. DiMatteo, 2021-11-05 For well over a decade this prized guide has served practitioners handling the legal ramifications of international contracting projects The fifth edition expands on issues discussed in the earlier one along with new topics that continue to redefine the researching drafting and execution of international contracts All the invaluable features of earlier editions are of course still here including analysis of key contract issues unique to various types of contracting common contract clauses contract checklists insights gleaned from actual cases and arbitral proceedings and

clear explanation of the principles of good contract drafting The major relevant international conventions model laws pertinent national laws legal guides and other documents and instruments are all covered with primary texts provided in the appendices Some of the new issues and topics covered include new potential causes of force majeure and hardship pandemics and BREXIT review of Incoterms 2020 new clauses covered anti slavery exclusion interpretation no waiver sub contracting sustainability clauses among others rise of new international commercial courts legaltech smart contracts and artificial intelligence ethics implementation of technology in legal practice enforceability of penalty clauses Internet sales and agency contracts long term contracts and goodwill compensation data protection and the General Data Protection Regulation GDPR alliance collaboration and cooperation agreements noncompete and nonsolicitation clauses e mail disclaimers and separation and release agreements The book acts as a single volume reference in the negotiating and drafting of international contracts and offers expert insights regarding the reasonableness of many contract clauses and the likelihood of their enforcement in a foreign jurisdiction An adroit combination of contract theory and contract practice the book continues to provide guidance to law practitioners and students alike International Contracting is an excellent single volume reference that highlights the different issues relating to a variety of contracts I recommend it to drafting attorneys writing domestic as well as transborder contracts Christopher E Howard complex commercial transactions and development projects Managing Partner Pierce Atwood LLP Portland Maine The latest edition of Professor DiMatteo s International Contracting constitutes a broad yet detailed coverage of international contract law and laws as well as international practice It drills down into the level of detail that supplies invaluable practical guidance of the sort not to be found in other publications Professor Michael G Bridge London School of Economics International Contracting is an ideal source for practitioners whether of the civil or common law It also provides a concise review of international contracting issues and practices for the scholar and student interested in this area of law I highly recommend it as a general resource on the topic Michel Cannarsa Dean Professor Lyon Catholic University

Private Law in the International Arena Jürgen Basedow, 2000-09 Private Law in the International Arena analyzes a wide variety of effects that cross border activities have on the operation of private law ranging from corporate and insolvency law to labor law property law the law of obligations family law European law and lex mercatoria Civil procedure aspects in national courts and arbitration proceedings are also explored This book provides a unique source of insights into the problems encountered and their possible solutions All contributions have been written in honor of an eminent Private International Law scholar Prof Dr Kurt Siehr
