A scholarly contribution to educational praxis M.A. Mokoena,J.M. (Ona) Janse van Rensburg,M. Erasmus,E. Mentz,C.B. Zulu,A. Cronje,E.K. Materechera,W.T. Dudu,A.T. Kanyimba,S.P. Raath,C. Kruger,A. Loubser,A.E. Pienaar,A. Klopper,S. Ellis,N.T. Petersen,J. de Beer,J. Varughese,A. Seugnet Blignaut,C. Els,2016-12-31 This publication contains original research targeting scientific specialists in the field of education through research endeavours grounded on a philosophical basis as well as being embedded in the empirical The research methodology of each chapter emanates from applicable philosophical assumptions in the form of an applicable theoretical and conceptual framework The latter forms a firm basis for the application of sound empiricism The content of this book adds to the body of scholarly knowledge in education In his evaluation of the book Acting Executive Dean Faculty of Education and Training Professor Akpovire Oduaran made the following remarks To a large extent the ideas put together in this book have come from data generated not just from literature found in books and journals but actual interactions with educators and the learning environment So then what the reader is offered in this volume is the articulation of ideas that have been interrogated structured and presented in surprisingly simplistic and yet incisive and academically enriching content that can match the standards of scholarship that is available in the Western World Yet what makes this book so welcome relevant and timely is the fact that it is built around Afrocentric theories and practices such as one may find in imported literature

Becoming a teacher Josef de Beer,2020-12-31 This book disseminates original research on learning in and from practice in pre service teacher education Authors such as Lederman and Lederman describe the student teaching practicum or work integrated learning WIL which is an essential component of pre service teacher education as the elephant in the room These authors note that the capstone experience in any teacher education programme is the student teaching practicum a fter all this is where the rubber hits the road However many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher This is the gap that this research book addresses Most of the chapters in the book report empirical data with the exception of two chapters that can be categorized as systematic reviews WIL is addressed from various angles in the chapters Chapter 6 focuses on research related to what makes Finnish teacher education so effective and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school based on Finnish insights in Johannesburg Chapter 3 highlights the challenges faced in open and distance learning teacher education contexts Several of the chapters disseminate research findings on alternative interventions to classic WIL namely where safe spaces or laboratories are created for student teachers to learn and grow professionally These could either be simulations such as software programmes and avatars in the intervention described in Chapter 2 student excursions as the findings in chapters 5 7 and 10 portray or alternative approaches to WIL e g Chapters 11

and 12 The book is devoted to scholarship in the field of pre service teacher education The target audience is scholars working in the fields of pre service teacher education work integrated learning and self directed learning The book makes a unique contribution in terms of firstly its extensive use of Cultural Historical Activity Theory as a research lens and secondly in drawing on various theoretical frameworks Both quantitative and qualitative research informed the findings of the book

Blended learning environments to foster self-directed learning Christo van der Westhuizen, Mncedisi C.

Maphalala, Roxanne Bailey, 2023-03-31 This book on blended learning environments to foster self directed learning highlights the focus on research conducted in several teaching and learning contexts where blended learning had been implemented and focused on the fostering of self directed learning Several authors have contributed to the book and each chapter provides a unique perspective on blended learning and self directed learning research From each chapter it becomes evident that coherence on the topics mentioned is established One of the main aspects drawn in this book and addressed by several authors in the book is the use of the Community of Inquiry CoI framework when implementing teaching and learning strategies in blended learning environments to foster self directed learning This notion of focusing on the CoI framework is particularly evident in both theoretical and empirical dissemination presented in this book What makes this book unique is the fact that researchers and peers in varied fields would benefit from the findings presented by each chapter albeit theoretical methodological or empirical in nature this in turn provides opportunities for future research endeavours to further the narrative of how blended learning environments can be used to foster self directed learning
