Twenty Years of Education Transformation in Gauteng 1994 to 2014 Maringe, Felix, Prew, Martin, 2015-05-05
Twenty Years of Education Transformation in Gauteng 1994 to 2014 An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994 These essays talk to what a provincial education department does and how and why it does these things whether it be about policy resourcing or implementing projects Each essay is written by one or more specialist in the relevant focus area The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years both nationally and provincially There has been no attempt to fit the book's chapters into a particular ideological or educational paradigm and as a result the reader will find differing views on various aspects of the Gauteng Department of Education's present and past We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years *The Education Triple Cocktail* Brahm Fleisch, 2018-08-15
The Education Triple Cocktail brings together rigorous quantitative and qualitative research on a new approach to improving foundational teaching and learning for schoolchildren living in working class poor and remote rural communities in resource constrained systems like South Africa At the core of this book is the theory and evidence for a powerful new interlocking and mutually reinforcing change model Inspired by the AIDS treatment story the three pronged approach of structured daily lesson plans appropriate and high quality educational materials and one on one instructional coaching to help teachers transform their instructional practices in early grade classrooms shows that it will improve learning outcomes For education systems defined by low levels of early grade learning and profoundly unequal outcomes The Education Triple Cocktail offers a theoretically informed evidence based way forward This book will be of immense use to teachers students of Education policymakers and parents The Global Testing Culture William C. Smith, 2016-01-04
The past thirty years have seen a rapid expansion of testing exposing students worldwide to tests that are now more than ever standardized and linked to high stakes outcomes The use of testing as a policy tool has been legitimized within international educational development to measure education quality in the vast majority of countries worldwide The embedded nature and normative power of high stakes standardized testing across national contexts can be understood as a global testing culture The global testing culture permeates all aspects of education from financing to parental involvement to teacher and student beliefs and practices The reinforcing nature of the global testing culture leads to an environment where testing becomes synonymous with accountability which becomes synonymous with education quality Underlying the global testing culture is a set of values identified from the increasing literature on world culture These include education as a human right academic intelligence faith in science decentralization and neoliberalism Each of these values highlights different aspects of the dialogue in support

of high stakes standardized testing The wide approval of these values and their ability to legitimate various aspects of high stakes testing reinforces the taken for granted notion that such tests are effective and appropriate education practices However a large body of literature emphasizes the negative unintended consequences teaching to the test reshaping the testing pool the inequitable distribution of school resources and teachers attention and reconstructing the role of the student teacher and parent commonly found when standardized census based tests are combined with high stakes outcomes for educators or students This book problematizes this culture by providing critical perspectives that challenge the assumptions of the culture and describe how the culture manifests in national contexts The volume makes it clear that testing per se is not the problem Instead it is how tests are administered used or misused and linked to accountability that provide the global testing culture with its powerful ability to shape schools and society and lead to its unintended undesirable consequences

Design and Implementation of Higher Education Learners' Learning Outcomes (HELLO) Barua, Kuntal, Radwan, Neyara, Singh, Virendra, Figueiredo, Ronnie, 2023-12-22 The Higher Education Learners Learning Outcomes HELLO project offers a comprehensive solution to the challenge of creating comparative metrics of learning outcomes that are valid across various cultures languages and higher education institution types Traditional methods of assessing learning outcomes in higher education have limited institutions abilities to compare student performance to that of their peers hindering efforts to improve teaching practices and enhance student learning This project creates learning outcome measures that are culturally and linguistically appropriate for different types of higher education institutions enabling institutions to compare student performance to that of their peers as part of efforts to improve teaching practices and enhance student learning Design and Implementation of Higher Education Learners Learning Outcomes HELLO edited by Kuntal Barua Neyara Radwan Mohammed Virendra Singh and Ronnie Figueiredo provides a persuasive account of the HELLO project and is intended for all students teachers administrations and higher education institutions interested in improving teaching practices and enhancing student learning outcomes The book presents the challenges in traditional methods of assessing learning outcomes the limitations of diverse attempts to fill the quality information gap and the rationale for HELLO beyond collegial approaches and student centered learning The book also explores key challenges in developing and executing HELLO such as the risks of ranking and value added methodologies By offering a comprehensive overview of the HELLO project this book provides higher education institutions with the information and motivation they need to participate in the project and enhance their students learning outcomes
