Cardiac computed tomography CT has become a highly accurate diagnostic modality that continues to attract increasing attention This extensively illustrated book aims to assist the reader in integrating cardiac CT into daily clinical practice while also reviewing its current technical status and applications Clear guidance is provided on the performance and interpretation of imaging using the latest technology which offers greater coverage better spatial resolution and faster imaging while also providing functional information about cardiac diseases The specific features of scanners from all four main vendors including those that have only recently become available are presented Among the wide range of applications and issues discussed are coronary calcium scoring coronary artery bypass grafts stents and anomalies cardiac valves and function congenital and acquired heart disease and radiation exposure Upcoming clinical uses of cardiac CT such as hybrid imaging preparation and follow up after valve replacement electrophysiology applications myocardial perfusion and fractional flow reserve assessment and plaque imaging are also explored **Deep Learning Methods and Applications in Brain**

**Imaging for the Diagnosis of Neurological and Psychiatric Disorders** Hao Zhang, Da Ma, Lei Wang, 2024-10-14 Brain imaging has been successfully used to generate image based biomarkers for various neurological and psychiatric disorders such as Alzheimer's and related dementias Parkinson's disease stroke traumatic brain injury brain tumors depression schizophrenia etc However accurate brain image based diagnosis at the individual level remains elusive and this applies to the diagnosis of neuropathological diseases as well as clinical syndromes In recent years deep learning techniques due to their ability to learn complex patterns from large amounts of data have had remarkable success in various fields such as computer vision and natural language processing Applying deep learning methods to brain imaging assisted diagnosis while promising is facing challenges such as insufficiently labeled data difficulty in interpreting diagnosis results variations in data

acquisition in multi site projects integration of multimodal data clinical heterogeneity etc The goal of this research topic is to gather cutting edge research that showcases the application of deep learning methods in brain imaging for the diagnosis of neurological and psychiatric disorders We encourage submissions that demonstrate novel approaches to overcome various abovementioned difficulties and achieve more accurate reliable generalizable and interpretable diagnosis of neurological and psychiatric disorders in this field
