places pupils in a position related to an advantaged pupil group But test construction and most data analyses were carried out by the criterion reference approach combined with a notion of master learning This enabled presentation of the absolute achievement level of a pupil or a pupil group vis a vis the optimal and minimal requirements of the curriculum and each school subject as well as for its various content area This approach permits much more than the traditional methods utilization of results for deliberation and revision in educational policies This applies particularly to curriculum construction and methods of instruction It may also lead to a more appropriate definition of the disadvantaged pupil Five chapters of the study present a historical review and sociological analysis of the problems of Israeli education and deal with specific methodological considerations The twelve following chapters present detailed results and analysis for each topic of investigation
