[Evolutions of the Complex Relationship Between Education and Territories](#) Angela Barthes, Pierre Champollion, Yves Alpe, 2018-03-15. The book weaves the story of the complex links between education and its territories. The aim here is to examine the education couple understood in the broadest sense: school, college, high school, universities and territory according to three main axes: the history and the characterization of the different ties maintained. And which the school and its territory always maintain. That of the categorization and characterization of the territories in which the school is situated, of the educational policies both explicit and grassroots connected with it and their effects on the school. That of recent pedagogical, didactic and organizational innovations. The book is based on French specialists in territorial education issues. **The Knowledge Gap** Natalie Wexler, 2019-08-06. Essential reading for teachers, education administrators and policymakers alike. STARRED Library Journal. The untold story of the root cause of America's education crisis. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it

comes to providing every child with a quality education The problem wasn't one of the usual scapegoats lazy teachers shoddy facilities lack of accountability It was something no one was talking about the elementary school curriculum's intense focus on decontextualized reading comprehension skills at the expense of actual knowledge In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars* Wexler brings together history research and compelling characters to pull back the curtain on this fundamental flaw in our education system one that fellow reformers journalists and policymakers have long overlooked and of which the general public including many parents remains unaware But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong it also follows innovative educators who are in the process of shedding their deeply ingrained habits and describes the rewards that have come along students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed If we truly want to fix our education system and unlock the potential of our neediest children we have no choice but to pay attention
