Recalibrating teacher training in African higher education institutions Sifiso Sibanda,Gideon (Deon) P. van Tonder,Washington T. Dudu,2023-03-01 This book critically examines the role of governments in promoting parity during and in post pandemic education This comes from the realisation that the pandemic has deepened the crisis by depleting the meagre resources that African countries might have devoted to normative educational practices where those on the margins would have been pushed further behind while the privileged would have been further initiated into the cultural and capital flows of private schools and historically research intensive institutions of higher learning This has far reaching implications for the education of underprivileged citizens and education particularly modes and modalities of delivery has to be reimagined to subvert the challenges wrought by the pandemic This book significantly bridges the gap between the pre and post COVID 19 pandemic pedagogical practices and the erstwhile modalities that have been resilient over time The book focuses on ways to stave off pedagogical challenges that face countries as the global pandemic makes its mark

From Technology Transfer to Intercultural Development S. Strijbos,Jan van der Stoep,2012-02-01 The idea for this book has been born in a dialogue

between the authors of *In Search of an Integrative Vision for Technology* 2006 and a group of scholars and practitioners from South Africa whose research and development activities focuses on problems of traditional African society and culture. Although there existed awareness in the writing of the earlier book that the search for normativity for our technological society should encompass the different cultural spheres of the world no attention has been paid to the problem of interculturality. Focussing on the development of technology in the developed societies the emphasis was laid on finding a basis for interdisciplinarity bridging the gaps between the sciences and humanities as well as between theory and practice. According to the vision that has been elaborated on in the above book not the autonomous dynamics of technology as a free flying projectile should determine the future of our global world but guidance has to be provided by a normative perspective on technology for the common good of all people and cultures. Following further this line of research the current book aims to address explicitly the intercultural dimension of technology in our globalising world. **Acta academica**, 2007

Intercultural Autoethnographies Claude-Hélène Mayer, Alyssa Govender, Present Raymond Ramalepe, 2025-07-23. *Intercultural Autoethnographies* brings together 20 personal narratives offering a deep exploration into the intercultural voyages of young South Africans. These positive autoethnographies delve into ways to traverse diversity and cultural differences and show the complexities of the transforming Post Apartheid society. **Positive Psychological Intervention Design and Protocols for Multi-Cultural Contexts** Llewellyn Ellardus Van Zyl, Sebastiaan Rothmann Sr., 2019-06-11. This volume presents innovative and contemporary methodologies and intervention protocols for the enhancement of positive psychological attributes in multicultural professional and organizational contexts. Most methods, models and approaches that underpin positive psychological interventions are confined to clinical samples, closed systems or monocultural contexts which restrict their applicability to particular contexts. Extensive practical intervention protocols, designs and methods which usually accompany first draft intervention papers are condensed into brief paragraphs in final manuscripts or removed in their entirety. This in turn reduces their potential for replicability or adoption by consumers, practitioners or industry. This volume develops guidelines for enhancing positive psychological attributes such as positive moods, e.g. positive affect, life satisfaction, strengths, e.g. gratitude, humour, cognitions, e.g. hope, optimism and behaviours, e.g. emotional regulation, positive relationship building within various multicultural contexts. Thereby it shows how positive psychology interventions can be replicated to a wide range of contexts beyond those in which they were developed. **Becoming a teacher** Josef de Beer, 2020-12-31. This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum or work-integrated learning (WIL) which is an essential component of pre-service teacher education as the elephant in the room. These authors note that the capstone experience in any teacher education programme is the student teaching practicum. After all, this is where the rubber hits the road. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the

student teacher to develop their own footing and voice as a teacher This is the gap that this research book addresses Most of the chapters in the book report empirical data with the exception of two chapters that can be categorized as systematic reviews WIL is addressed from various angles in the chapters Chapter 6 focuses on research related to what makes Finnish teacher education so effective and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school based on Finnish insights in Johannesburg Chapter 3 highlights the challenges faced in open and distance learning teacher education contexts Several of the chapters disseminate research findings on alternative interventions to classic WIL namely where safe spaces or laboratories are created for student teachers to learn and grow professionally These could either be simulations such as software programmes and avatars in the intervention described in Chapter 2 student excursions as the findings in chapters 5 7 and 10 portray or alternative approaches to WIL e g Chapters 11 and 12 The book is devoted to scholarship in the field of pre service teacher education The target audience is scholars working in the fields of pre service teacher education work integrated learning and self directed learning The book makes a unique contribution in terms of firstly its extensive use of Cultural Historical Activity Theory as a research lens and secondly in drawing on various theoretical frameworks Both quantitative and qualitative research informed the findings of the book
