 Technical and Scientific Communication Effective Documentation is a major sourcebook that offers technical writers editors
 teachers and students of technical communication a wide variety of practical guidelines based on often hard to find research
 in the usability of printed and electronic media The book s eighteen chapters provide a wealth of material on such topics of
 current interest as the writing of design manuals research in cognitive psychology as applied to the design of user manuals
 and the organizing of manuals for hierarchical software systems Included are chapters by such well known scholars in the
 field as Philip Rubens Robert Krull Judith Ramey and John Carroll Effective Documentation reviews the advice offered by
 other how to produce usable documentation books describing the different types of usability research and explaining the
 inherent biases of each type It goes beyond the actual design of textual and or electronic media to look at these designs in
 context giving advice on effective management good management is a requisite of good writing on the relationship between

document design and product design and on how to find out who one's readers really are. Advances in the presentation of textual information are explained with suggestions on how to improve the usability of individual sentences and the design of entire books. The concluding chapters discuss advances in the design and use of online information and offer valuable insights into the use of graphic information and the development and design of information communicated via electronic media. Stephen Doherty Farina is Assistant Professor of Technical Communication at Clarkson University. Effective Documentation is included in the Information Systems series edited by Michael Lesk. Electronic Bulletin Board User Guide Federal Quality Institute (U.S.). Information Network, 1992. How to Write Technical Reports Lutz Hering, Heike Hering, 2010-10-14. Technical Reports are usually written according to general standards, corporate sign standards of the current university or company, logical rules and practical experiences. These rules are not known well enough among engineers. There are many books that give general advice in writing. This book is specialised in how to write Technical Reports and addresses not only engineers but also natural scientists, computer scientists etc. It is based on the 6th edition published in 2008 by Vieweg in German and is now published as 1st edition by Springer in English. Both authors of the German edition have long experience in educating engineers at the University of Applied Sciences Hannover. They have held many lectures where students had to write reports and took notes about all positive and negative examples that occurred in design reports, lab work reports and in theses. Prof. Dr. Lutz Hering has worked for VOLKSWAGEN and DAIMLER and then changed to the University of Applied Sciences Hannover where he worked from 1974 until 2000. He held lectures on Technical Drawing, Construction and Design, CAD and Materials Science. Dr. Heike Hering worked nine years as a Technical Writer and was responsible for many CAD manuals in German and English. She is now employed at TV NORD Akademie where she is responsible for E-Learning projects, technical documentation and software training and supervises students who are writing their theses.
