Hispanic Contact Linguistics Luis A. Ortiz López, Rosa E. Guzzardo Tamargo, Melvin González-Rivera, 2020-02-14 This volume comprises cutting edge research on language contact and change. The chapters present a wide scope of settings in which Spanish is in contact with other languages such as Catalan, English and Quechua, a large breadth of geographical areas e.g. United States, Puerto Rico, Colombia, Brazil, Argentina and varied participant groups ranging from dialect contacts, second language learners and heritage speakers to balanced bilinguals and code switchers. Taken together, the chapters provide rich empirical descriptions of data pertaining to different levels of language diversity, naturalistic and experimental methodological approaches to data collection as well as theoretical implications of the findings. The interdisciplinary perspective adopted by the authors contributes to the linguistic analysis and offers important insights into theoretical linguistics in general and into theories of sociolinguistics, language variation, bilingualism and second language acquisition.

The Next Phase in Heritage Language Studies: Methodological Considerations and Advancements Fatih Bayram, Maki Kubota, Sergio Miguel Pereira Soares, 2024-03-27 Over the past three decades, studies investigating heritage speaker (HS) linguistic competencies have shown time and again that despite being L1 or 2L1 native speakers of their home language, HS outcomes display variation across a wide spectrum of differences as compared to each other, other types of bilinguals as well as their monolingual peers. Studies have traditionally used mostly behavioral methodologies rooted in adjacent established fields e.g. L1 acquisition, adult L2 acquisition, offering in addition to documenting and describing HS performance, important insights for linguistic theory and challenges related to home minority language maintenance, contact policy and more. A birds-eye view makes it clear that the methodologies one uses to tap into HSs' linguistic knowledge areas, if not more, are important than the phenomena under investigation, especially in light of how their unique experiences with their heritage and other languages are present across a continuum.

Practical LTE based security forces PMR networks Arnaud Henry-Labordère, 2022-09-01 Security forces PMR networks are moving from proprietary technologies for their Mission Critical Push To Talk basic service and their data services which must provide large bandwidth, real-time access to the databases. LTE Based is adopted with backup access to public MNOs to complement their own radio coverage. Specific technologies such as multicasting of video are required so the MCPTT works within a restricted bandwidth. The need to be able to change the main MNOs to provide resilient coverage requires specific choices of SIM cards with OTT security domains. Practical LTE Based Security Forces PMR Networks assumes that the reader has a basic knowledge of the 4G network architecture and services and the book focusses on the specific features and choices required to fulfill the need of security forces PMR networks. These include tactical and centralized including LTE based voice services VoLTE and IMS. It can be used as a reference or textbook with many detailed call flows and traces being included. The author, who has also a long teaching career in Operations Research, provides mathematical models for the optimization of

tactical network federations multicast coverage and allocation of preemptive priorities to PMR group members He is a pioneer in the area of Virtual Roaming an application of graph theory and telecommunications to provide roaming without direct relations having previously published books on SMS Hubs SS7 Hubs Diameter Hubs GTP Hubs The use of M2M monitoring devices for security forces with mobility is covered in detail in the book including the new LoRa virtual roaming which goes beyond the scope of PMR
