

Caribbean Disaster Mitigation Project
Implemented by the Organization of American States
Unit of Sustainable Development and Environment
for the USAID Office of Foreign Disaster Assistance and the Caribbean
Regional Program

In the fall of 1998, the Caribbean Hotel Association (CHA) and the Caribbean Tourism Organization (CTO) produced a Hurricane Procedures Manual as a guidebook for tourist establishments in the Caribbean.
The Caribbean Disaster Mitigation Project supported the development of a chapter on 'Structural Vulnerability and Loss-Reduction Techniques' for inclusion in this manual.

The Caribbean Hurricane Experience

Hurricanes are a fact of life in the Caribbean (See [Appendix I](#)). Within the past nine years, from 1988 through 1997, several hurricanes have unleashed their fury on the islands of the Caribbean. Hurricanes David in 1979, Allen in 1980, Gilbert in 1988, Hugo in 1989 and Luis and Marilyn in 1995 caused significant damage to hotels in Dominica, St. Lucia, Jamaica, Montserrat, Antigua,

Local Strategies for Addressing Climate Change: Guide helping coastal managers communicate about climate change ,2009 Statistical Methods for QTL Mapping Zehua Chen,2013-11-01 While numerous advanced statistical approaches have recently been developed for quantitative trait loci QTL mapping the methods are scattered throughout the literature Statistical Methods for QTL Mapping brings together many recent statistical techniques that address the data complexity of QTL mapping After introducing basic genetics topics and statistical principles the author discusses the principles of quantitative genetics general statistical issues of QTL mapping commonly used one dimensional QTL mapping approaches and multiple interval mapping methods He then explains how to use a feature selection approach to tackle a QTL mapping problem with dense markers The book also provides comprehensive coverage of Bayesian models and MCMC algorithms and describes methods for multi trait QTL mapping and eQTL mapping including meta trait methods and multivariate sequential procedures This book emphasizes the modern statistical methodology for QTL mapping as well as the statistical issues that arise during this process It gives the necessary biological background for statisticians without training in genetics and likewise covers statistical thinking and principles for geneticists Written primarily for geneticists and statisticians specializing in QTL mapping the book can also be used as a supplement in graduate courses or for self study by PhD students working on QTL mapping projects *Aware* ,2005 **Mind Mapping: The Mind Mapping Guide to Maximize Your Productivity (How to Improve Memory and Boost Productivity to Achieve Greater Clarity and Performance)** Hubert Baird,101-01-01 This book is your ultimate guide in mastering thought organization using the idea mapping More than the technical help you may get there is a practical side to it as well Learn how to use visual aids and become friends with them so you can easily remember the flow of your thoughts Using keywords can also become handy in these times for they will save a lot of spaces from what s currently running in your head Other tips would be limiting yourself away from any distractions so you can learn how to focus There are actually more to find out and you ll be surprised as how easy they are once you apply them to you There are tons of them inside Throughout the book you will learn more about how you can develop yourself into a better communicator in any application whether personal or professional In this groundbreaking book you ll discover How to boost focus enhance memory and minimize distractions using customized mind maps Strategies for supercharging your time management and achieving your goals Techniques for strengthening emotional intelligence and improving relationships Ways to unleash your creativity and problem solving abilities Methods for seamlessly integrating mind mapping into your daily life And Mind Mapping isn t just for the workplace It can help you in every area of your life applying the same principles to everyday problems in your personal a family life The Mind Mapping technique is proven and has been successfully used for centuries even by complete novices And now you can learn the secrets of this amazing concept **Cartographies of Danger** Mark Monmonier,2008-04-15 No place is perfectly safe but some places are

more dangerous than others Whether we live on a floodplain or in Tornado Alley near a nuclear facility or in a neighborhood poorly lit at night we all co exist uneasily with natural and man made hazards As Mark Monmonier shows in this entertaining and immensely informative book maps can tell us a lot about where we can anticipate certain hazards but they can also be dangerously misleading California for example takes earthquakes seriously with a comprehensive program of seismic mapping whereas Washington has been comparatively lax about earthquakes in Puget Sound But as the Northridge earthquake in January 1994 demonstrated all too clearly to Californians even reliable seismic hazard maps can deceive anyone who misinterprets known fault lines as the only places vulnerable to earthquakes Important as it is to predict and prepare for catastrophic natural hazards more subtle and persistent phenomena such as pollution and crime also pose serious dangers that we have to cope with on a daily basis Hazard zone maps highlight these more insidious hazards and raise awareness about them among planners local officials and the public With the help of many maps illustrating examples from all corners of the United States Monmonier demonstrates how hazard mapping reflects not just scientific understanding of hazards but also perceptions of risk and how risk can be reduced Whether you live on a faultline or a coastline near a toxic waste dump or an EMF generating power line you ignore this book s plain language advice on geographic hazards and how to avoid them at your own peril

Flying Higher Morten Beyer,2009-10-08 The rise of transport airlines stems from the final days of World War II when airplanes were used mostly by the military and for Government mail Juan Trippe s idea of an Empire of the Air transporting people was a distant dream There were no footsteps to follow Beyer working himself up through the ranks cast his practical eye at the many aspects of how an airline could run and prosper and became known as an efficiency wizard During his international career he says what it was like dealing with government regulations he describes the fleets and their maintenance and at one point a revolution All this is interspersed with some hilarious anecdotes It was a risky business and this is the true adventure of Mort Beyer s life as the president of several scheduled and non scheduled airlines over a span of sixty years
