National Bibliography B. S. Kesavan,2017-12 *From Social Harm to Zemiology* Victoria Canning,Steve Tombs,2021-03-30 This book outlines key developments in understanding social harm by setting out its historical foundations and the discussions which have proliferated since It examines various attempts to conceptualise social harm and highlights key sites of contestation in its relationship to criminology to argue that these act as the basis for an activist zemiology one directed towards social change for social justice The past two decades have seen a proliferation of debate related to social harm in and around criminology From climate catastrophe and a focus on environmental harms unprecedented deaths generating focus on border harms and the coronavirus pandemic revealing the horror of mass and arguably avoidable deaths across the globe critical studies in social harm appear ever more pressing Drawing on a range of international case studies of cultural emotional physical and economic harms *From Social Harm to Zemiology* locates the study of social harm in an accessible fashion In doing so it sets out how a zemiological lens can moves us beyond many of the problematic legacies of criminology

This book rejects criminologies which have disproportionately served to regulate intersectional groups and which have arguably inflicted as much or more harm by bolstering the very ideologies of control in offering minor reforms that inadvertently expand and strengthen states and corporations. It does this by sketching out the contours, objects, methods and ontologies of a disciplinary framework which rejects commonplace assumptions of value, freedom. From Social Harm to Zemiology, advocates social change in accordance with groups who are most disenfranchised and thus often most socially harmed. An accessible and compelling read, this book is essential reading for all zemiologists, critical criminologists and those engaged with criminological and social theory. *The Indian National Bibliography*, 2017-10 *Love is Green: Compassion as responsibility in the ecological emergency* Lucy Weir, 2020-01-31 This book links three themes: non-dualistic agency, the good of systems and compassionate attunement, and relates them to the ecological emergency. The author begins by examining how we currently understand our ability to choose what we do, our agency, and concludes that this is dualistic: we think of an action to do and then we physically act. Yet an understanding that we are enmeshed in context means our capacity to act freely dissolves in the mesh. We evolved capacities for consciousness and awareness, capacities that allow us to realise that we are here now, but that do not inevitably imply choice. Our capacity for realisation gives us the ability to elicit an emotional response. When we understand our enmeshment, we can attune to a deep compassion for ourselves and indeed for all systems unfolding through time. Compassionate attunement allows a different set of options for action to become available to us. This then shifts how we respond to ourselves, our human relationships and to the ecological emergency we are currently embroiled in. This work is inspired by the great Kamakura Zen Master Eihei Dogen. The book's contribution is to extend and link the notion of practice, realisation with the literature on evolutionary biology and entropy maximisation, which allows us to speak of the good of systems. Systems unfold as good for us when biodiversity maximisation occurs. By considering the ecological emergency in light of compassionate attunement, we open ourselves to a new array of possibilities for action. Some of these, the author outlines in the conclusion, relating them to existing literature on compassionate achievement and compassionate communication to show how our practice shifts our relationship to ourselves, to one another and to the ecological emergency, thus changing the course of human history. **NICE at 25** Peter Littlejohns, Keith Syrett, 2024-08-30 Marking its 25th anniversary, this fascinating collection examines the pioneering work of the National Institute for Health and Care Excellence (NICE). Setting standards for the delivery of healthcare, issuing guidance on public health and assessing and making recommendations on health technologies, NICE has attracted widespread international attention, emulation and comment. The authors in this collection, drawn from a broad range of disciplinary backgrounds, offer analysis of key issues which have informed NICE's work, from the principles of health economics to patient engagement to the legal basis on which NICE operates. Covering many of the most important themes within contemporary debates on health policy and management, today this insightful collection will interest students and researchers as well as policy makers in the field. Cort MacLean Johns, Ph.D.-HSG,2021-02-18 Ever increasing research evidence continues to mount Having started my research on the connection of the Hydraulis to the roots of the more recent Industrial Revolution at the University of St Gallen in 1989 over 30 years ago I continue to identify additional support for it We do not know whether the beginnings of an Industrial Revolution in Hellenistic Greece would have continued if not cut off by the Roman Empire s conquests Neither do we know whether the more recent latent Industrial Revolution could have risen up again in the 17th century without Vitruvius or Hero of Alexander s preserved writings The point of this book is to emphasize with new findings that had the Romans not stopped the growth of science and technology in the Hellenistic Period that it would have likely continued to develop into a full fledged Industrial Revolution Secondly the more recent Industrial Revolution borrowed heavily on the technology and science of the Hellenistic Period In the true sense of the Renaissance 17th century industrial progress largely picked up the written remnants of Antiquity to be able to continue on after a centuries long caesura **Rights Claiming in**

Speech Andrea Ravignani,Henkjan Honing,Sonja A. Kotz,2018-07-24 Human speech and music share a number of

similarities and differences One of the closest similarities is their temporal nature as both i develop over time ii form sequences of temporal intervals possibly differing in duration and acoustical marking by different spectral properties which are perceived as a rhythm and iii generate metrical expectations Human brains are particularly efficient in perceiving producing and processing fine rhythmic information in music and speech However a number of critical questions remain to be answered Where does this human sensitivity for rhythm arise How did rhythm cognition develop in human evolution How did environmental rhythms affect the evolution of brain rhythms Which rhythm specific neural circuits are shared between speech and music or even with other domains Evolutionary processes long time scales often prevent direct observation understanding the psychology of rhythm and its evolution requires a close fitting integration of different perspectives First empirical observations of music and speech in the field are contrasted and generate testable hypotheses Experiments exploring linguistic and musical rhythm are performed across sensory modalities ages and animal species to address questions about domain specificity development and an evolutionary path of rhythm Finally experimental insights are integrated via synthetic modeling generating testable predictions about brain oscillations underlying rhythm cognition and its evolution Our understanding of the cognitive neurobiological and evolutionary bases of rhythm is rapidly increasing However researchers in different fields often work on parallel potentially converging strands with little mutual awareness This research topic builds a bridge across several disciplines focusing on the cognitive neuroscience of rhythm as an evolutionary process It includes contributions encompassing although not limited to 1 developmental and comparative studies of rhythm e g critical acquisition periods innateness 2 evidence of rhythmic behavior in other species both spontaneous and in controlled experiments 3 comparisons of rhythm processing in music and speech e g behavioral experiments systems neuroscience perspectives on music speech networks 4 evidence on rhythm processing across modalities and domains 5 studies on rhythm in interaction and context social affective etc 6 mathematical and computational e g connectionist symbolic models of rhythmicity as an evolved behavior The Pattern Seekers Simon

Baron-Cohen, 2020-11-10 A groundbreaking argument about the link between autism and ingenuity Why can humans alone invent In The Pattern Seekers Cambridge University psychologist Simon Baron Cohen makes a case that autism is as crucial to our creative and cultural history as the mastery of fire Indeed Baron Cohen argues that autistic people have played a key role in human progress for seventy thousand years from the first tools to the digital revolution How Because the same genes that cause autism enable the pattern seeking that is essential to our species s inventiveness However these abilities exact a great cost on autistic people including social and often medical challenges so Baron Cohen calls on us to support and celebrate autistic people in both their disabilities and their triumphs Ultimately The Pattern Seekers isn t just a new theory of human civilization but a call to consider anew how society treats those who think differently
