Ensuring Innovation in Diagnostics for Bacterial Infection Morel C., McClure L., Edwards S., Goodfellow V., Sandberg D., Thomas J., 2016-04-18 The inappropriate use of antibiotics is a primary cause of the ongoing increase in drug resistance amongst pathogenic bacteria The resulting decrease in the efficacy of antibiotics threatens our ability to combat infectious diseases Rapid point of care tests to identify pathogens and better target the appropriate treatment could greatly improve the use of antibiotics Yet there are few such tests currently available or being developed despite the rapid pace of medical innovation Clearly something is inhibiting the much needed development of new and more convenient diagnostic tools This study delineates priorities for developing diagnostics to improve antibiotic prescription and use with the goal of

managing and curbing the expansion of drug resistance It calls for new approaches particularly in the provision of diagnostic devices and in doing so outlines some of the inadequacies in health science and policy initiatives that have led to the dearth of such devices The authors make the case that there is a clear and urgent need for innovation not only in the technology of diagnosis but also in public policy and medical practice to support the availability and use of better diagnostic tools This book explores the complexities of the diagnostics market from the perspective of both supply and demand unearthing interesting bottlenecks some obvious some more subtle It calls for a multifaceted and broad policy response and an overhaul of current practice so that the growth of bacterial resistance can be stemmed

Raising the Living Dead Alberto Ortiz Díaz, 2023-03-08. An eye-opening look at how incarcerated people, health professionals and others behind and beyond bars came together to problem-solve incarceration. Raising the Living Dead is a history of Puerto Rico's carceral rehabilitation system that brings to life the interactions of incarcerated people, their wider social networks and health care professionals. Alberto Ortiz Díaz describes the ways that multiple communities of care came together both inside and outside of prisons to imagine and enact solution-oriented cultures of rehabilitation from the 1930s to the 1960s. Scientific and humanistic approaches to well-being were deliberately fused to raise the living dead, an expression that reemerged in the modern Caribbean to refer to prisoners. These reform groups sought to raise incarcerated people physically, mentally, socially, spiritually and civically. The book is based on deep original archival research into the Oso Blanco White Bear penitentiary in Puerto Rico, yet it situates its study within Puerto Rico's broader carceral archipelago and other Caribbean prisons. The agents of this history include not only physical health professionals but also psychologists and psychiatrists, social workers, spiritual and religious practitioners and, of course, the

prisoners and their families By following all these groups and emphasizing the interpersonal exercise of power Ortiz D az tells a story that goes beyond debates about structural and social control The book addresses key issues in the history of prisons and the histories of medicine and belief including how prisoners different racial class and cultural identities shaped their incarceration and how professionals living in a colonial society dealt with the challenge of rehabilitating prisoners for citizenship *Raising the Living Dead* is not just about convicts their immediate interlocutors and their contexts however but about how together these open a window into the history of social uplift projects within the neo colonial societies of the Caribbean There is no book like this in Caribbean historiography few examine these themes in the larger literature on the history of prisons
