**Management,**

**Uncertainty, and Accounting** Akira Nishimura, 2018-07-23 This book is a capstone to the magisterial career of one of Japan's most senior scholars of risk accounting and management. How can companies and organizations navigate today's world rife with unexpected challenges and opportunities? In this trenchant book, Nishimura offers case studies, theoretical models, and useful strategies for the new normal. This book will be useful to scholars, businesspeople, and bankers. *Management Control Theory* A.J. Berry, J. Broadbent, D.T. Otley, 2019-05-23 First published in 1998, this volume of readings provides an overview of the development of the study of Management Control theory over the past 35 years. The period encompasses the publication of a major and seminal text by Anthony and Dearden in 1965, which acted as a touchstone in defining the range and scope of management control systems. This laid management control's foundations in accounting-based mechanisms of control, an element which has been seen as both a strength and a constraint. A good deal of work has followed, providing both a development of the tradition as well as a critique. In this volume, we attempt to provide a range of readings which will illustrate the variety of possibilities that are available to researchers, scholars, and practitioners in the area. The readings illustrate the view that sees control as goal-directed and integrative. They go on to explore the idea of control as adaptation, consider its relationship with social structure, and survey the effects of the interplay between the organisation and the environment. The essays included are not intended to lead the reader through a well-ordered argument which concludes with a well-reasoned view of how management control should be. Instead, it seeks to illustrate the many questions which have been posed but not answered and to open up agendas for future research. **Management Control Systems and Cross-Cultural Research** Michael Hanzlick, 2015-01-31 A fundamental challenge that management faces in the twenty-first century is how to exercise adequate control, i.e. how to guide and direct the behaviour of their subordinates. With increasing globalisation, firms witness a cross-cultural impact too. Of particular interest is the question of whether to use the standardized form of control similar to the home base of firms or whether to adapt their control practices to the local specificities. Given the meagre state of the literature in management control with a cross-cultural emphasis, this study addresses a real-world problem, namely the question whether management control practices are configured similarly or differently across cultures. Relying on a generalized industry sample across four countries (Belgium, Canada, Germany, and Poland), this study sought to shed light on one of the more intriguing questions: does culture matter for specific control areas, in particular for performance measurement, performance evaluation, and reward systems? The theoretical foundations are grounded in the cultural framework of the GLOBE project, accompanied by thoughts of new institutionalism, stakeholder theory, and contingency thoughts. Hypotheses are tested by mean comparisons, ANOVA, ANCOVA. The empirical findings highlight cultural differences for a broader set of control practices and deliver new insights into the intersection of culture and management control. This dissertation crafts a novel topic with high relevance for both researchers and practitioners. The study demonstrates areas for which management control practices should be adapted to the local needs and areas for which

those practices could be harmonized in the whole company This monograph stresses some areas in which future empirical cross cultural research can benefit and some areas where conceptual thoughts could be advanced

**Accounting for Management Control** David Otley and Kenneth Merchant Clive Emmanuel,2013-11-21 Covers all aspects of accounting management for both programmed and non programmed activities At the end of each chapter there is a set of exercises to facilitate understanding of the topics discussed and case studies have been included in the final chapter

**Risk Profile**  
Contingent Analysis of Management Control Systems Peter Göstl,2019-10-01 This study contributes to an existing and growing body of literature in the field of management accounting and control concerned with implications from increased uncertainty on MCS design and use It is found that the choice of MCS reflects the firm s risk profile and that firms that choose MCS design and use better suited to their risk profile perform better than others Using data from a survey of 362 Chief Executive Officers this study yields a model of fit that enables the stimulation of selective improvements and helps to achieve a competitive advantage
