

## How to Use This Guide

This guide provides brief instructions for the commonly used features available with the SUPERSET 430 telephone. Some of these features are accessed by using the function keys on your telephone. In the instructions in this guide, the function keys are represented by upper case words (e.g., MESSAGE).

The six blue Softkeys on your telephone set allow you to access many more telephone features. These keys are unlabeled because their functions can change. The SUPERKEY function key allows you to access the many functions available on the softkeys. In the instructions in this guide, the softkey labels that appear in the Main Display are presented in *italic text* (e.g., *Message*).

## Keys, Indicators and Displays

1. **SUPERKEY**: for programming Personal Keys as Speed Call Keys, accessing most set features, and displaying set information.
2. **Softkeys** (blue keys under the Main Display): for performing the commands shown in the Main Display.
3. **Personal Keys**: used as line select keys, and may also be programmed as speed dial or feature access keys.
4. **MESSAGE Key**: for sending and responding to messages.
5. **HOLD Key** (red key): for placing calls on hold.
6. **SPEAKER Key**: for turning the set speaker on and off during onhook operation.
7. **APPLICATION Key**: Presently not active.
8. **MICROPHONE Key**: for turning the microphone on or off (a privacy feature) during an onhook call.
9. **VOLUME/TONE/CONTRAST ^ Key** and **VOLUME/TONE/CONTRAST v Key**: for changing the volume of the handset/receiver, the volume and pitch of the ringer, and adjusting the contrast of the Main Display.
10. **Line Status Display**: shows which Personal Keys are active and their status.
11. **Main Display**: shows SuperKey instructions and Softkey labels, time and date, call status, messaging and system error information.
12. **Message Lamp**: when flashing, it indicates that a message is waiting. When flashing a call, then a message can be sent.
13. **Microphone Lamp**: When lit, it indicates that the microphone is on.

## Line Appearances and Personal Keys

Your SUPERSET 430 telephone can accommodate up to 12 lines, including your prime line (your listed number). A Personal Key can be programmed as a Line Select Key to access a telephone line, in which case you will have an "appearance" of the line, located in the Line Status Display directly across from each Line Select Key.

You can access another line just by pressing the Line Select Key for it. The Line Appearance indicators show you the status of the lines which you have programmed on your set.

When a line is ...	the line appearance is ...
idle	lit
Busy	solid on
Ringng	flashing slowly
On hook at your set	flashing rapidly
On hook at another set	flashing in a slow-on, fast-off cycle on your set's line appearance

A Personal Key can also be programmed as a Feature Key for quick access to an often used feature. When that key is pressed to turn on the feature, the Line Appearance for that key will turn on.

## Features Not Available

There may be procedures in this guide which you cannot perform on your telephone set. This is because your company has specially selected your features and calling privileges.

The feature will not appear if it has not been enabled. See your Communications Department if you have any questions.

## Making Calls

Dialing from your SUPERSET 430 is exactly the same as dialing from any other telephone. (Set use the displayed list the number, including any outside access code (usually the number "9"), if required.
