Griffith,Tyler C. Ré,2023-12-09 Dissemination is a key component of the research process While several fields have developed resources dedicated to training and supporting their scientists and practitioners as they are encouraged to disseminate within their fields and to the larger public audience there has been a lack of formal guidance for dissemination within the behavioral sciences *Disseminating Behavioral Science* aims to fill that gap providing guidance across modalities for topics ranging from the peer review process to conference presentation to nontraditional avenues for dissemination The contents of this edited text divided across six sections serves as a roadmap for students junior researchers and senior scholars The first section includes types of academic scholarship types of dissemination and strategies to ensure ethical dissemination The second reviews traditional publication preparation including tips for the writing process and key components to include in each section of a scientific manuscript Section Three explores publication within a traditional peer reviewed journal Section Four outlines additional strategies to get research publicly recognized through conference presentations social media and popular media sources and white and grey literature Sections Five and Six offer a consolidated glossary of all key terms in the text and combined reference list *The Royal Marsden Manual of Clinical Nursing Procedures* Lisa Dougherty,Sara Lister,Alex West-Oram,2015-03-17 The Royal Marsden Manual of Clinical Nursing Procedures has been the number one choice for nurses since it first published over 30 years ago One of the world s most popular books on clinical skills and procedures it provides detailed procedure guidelines based on the latest research findings and expert clinical advice enabling nurses and students to deliver clinically effective patient focused care The ninth edition of this essential definitive guide written especially for pre registration nursing students now includes a range of new learning features throughout each chapter that have been designed to support student nurses to support learning in clinical practice Providing essential information on over 200 procedures this manual contains all the skills and changes in practice that reflect modern acute nursing care **Peer review in scientific publications** Great Britain: Parliament: House of Commons: Science and Technology Committee,2011-07-28 This report indicates that the oversight of research integrity in the UK is unsatisfactory The Science and Technology Committee concludes that in order to allow others to repeat and build on experiments researchers should aim for the gold standard of making their data fully disclosed and made publicly available The report examines the current peer review system as used in scientific publications and the related issues of research impact data management publication ethics and research integrity The UK does not seem to have an oversight body for research integrity covering advice and

assurance functions across all disciplines and the Committee recommends the creation of an external regulator. It also says all UK research institutions should have a specific member of staff leading on research integrity. The report highlights concerns about the use of journal Impact Factor as a proxy measure for the quality of research or of individual articles. Innovative ways to improve current pre publication peer review practices are highlighted in the report including the use of pre print servers, open peer review, increased transparency and online repository style journals. The growth of post publication peer review and commentary also represents an enormous opportunity for experimentation with new media and social networking tools which the Committee encourages. There should also be greater recognition of the work sometimes considered to be a burden carried out by reviewers by both publishers and employers. In order to do this publishers need to have in place systems for recording and acknowledging the contribution of those involved in peer review.

The Editor's Handbook Leslie H. Nicoll, Peggy L. Chinn, 2019-06-26 The completely updated 3rd edition of The Editor's Handbook is an invaluable resource to all those involved in various aspects of scholarly writing in nursing. Both novice and experienced editors will no doubt find the information quite useful as they did the first two editions. Although the main focus of the handbook is on the editors of nursing journals, all types of nurse writers will appreciate the extensive details and helpful tips. Nurses who are in the process of preparing manuscripts for publication can use the handbook to enhance their success at journal acceptance by getting a unique view of the editor's role and perspective.

Porth's Pathophysiology Sheila Grossman, 2013-08-13 Featuring brilliant art, engaging new case studies and dynamic new teaching and learning resources, this 9th edition of Porth's Pathophysiology: Concepts of Altered Health States is captivating, accessible and student friendly while retaining the comprehensive nursing focused coverage that has made it a market leader. The book's unique emphasis on concepts of altered health states as opposed to factual descriptions of diseases and disorders helps students grasp both the physical and psychological aspects of altered health. Drawing on the expertise of new co author Sheila Grossman, the Ninth Edition maintains its comprehensive depth while paring down content where appropriate and replacing descriptive content with striking art. Approximately 600 illustrations are new or have been re-rendered in a consistent modern style. Also new to this edition are advanced 3D narrated animations that address the most clinically relevant and difficult to understand disorders, engaging unit opening case studies that reinforce critical thinking and set the tone for the content to come, and a wide range of built-in study tools. Now for the first time, Porth's Pathophysiology is supported by PrepU, an adaptive learning system that helps students learn more while giving instructors the data they need to monitor each student's progress, strengths and weaknesses.
