Note: The pictographs shown to the left of the Spare Fault Indicators (2) are present only in paralleling applications.

The main component of the EMCP II+P system is the generator set control (GSC+P). The GSC+P is designed to operate when the GSC+P is powered by 24 DCV or 32 DCV. The GSC+P monitors and controls many of the functions of the generator set. The functions and features of the GSC+P are listed below.

- The GSC+P provides the generator AC output information. The information includes the metering of power. The GSC+P controls starting and stopping of the engine.
- The GSC+P shows engine conditions and generator output information on two displays.

- The displays show the fault codes. The displays also show the information for programming that is used by the GSC+P.
- The GSC+P monitors the system for faults. If a fault occurs, the GSC+P provides a fault alarm annunciation or the GSC+P performs a controlled fault shutdown. The GSC+P uses indicators and displays in order to describe the fault to the operator or the service technician.
- The GSC+P contains programmable features for certain applications. The programmable features are also used by the GSC+P in order to meet the requirements of the customers.

Note: Setting P023 to 0 ensures proper operation on MUI engines. Set P023 to 1 for Gas engines. Set P023 to 2 for EUI engines. Failure to set setpoint P023 can result in improper engine operation, incorrect display of engine parameters, and logging an erroneous CID 590 diagnostic code. For more information on the P023 setpoint and other GSC+P setpoints, refer to Systems Operation, "Engine-Generator Programming GP5-0".

Comprehensive Research Compliance Program Aurali Dade,Lori Olafson,Suzan M. DiBella,2015-07-01 The senior

research compliance administrator has emerged as a critically important position as universities and other research organizations face an increasingly intricate regulatory environment. These administrators are tasked with a special challenge ensuring that their institutions conduct safe ethical and compliant research while also helping researchers understand and meet compliance requirements and achieve their research goals. These competing responsibilities can make the role of the research administrator complex; however, those who serve in this role may find that they have limited preparation for the challenges and little or no formal education in the field. Thus, the goal of this handbook is to provide practical guidance to research administrators who are responsible for a wide variety of compliance programs. Previous volumes on these topics have focused primarily on educating research faculty, staff, and students. An assumption in many of these handbooks is that all additional questions related to research ethics and regulations should be directed to the senior research administrator; yet, the books have limited guidance intended for the senior research administrators themselves. This handbook is designed therefore to serve as a detailed program implementation manual for these administrators who are expected to be conversant on a broad range of complex ethical and regulatory topics and to provide guidance to those conducting research as well as upper administration and others interested in safe ethical and compliant research. **Mergent Municipal & Government**
