New Jersey Licensed Occupations, 2005 Emergency Medical Services for Children Institute of Medicine, Committee on Pediatric Emergency Medical Services, 1993-02-01 How can we meet the special needs of children for emergency medical services EMS when today's EMS systems are often unprepared for the challenge This comprehensive overview of EMS for children EMS C provides an answer by presenting a vision for tomorrow's EMS C system and practical recommendations for attaining it Drawing on many studies

and examples the volume explores why emergency care for children from infants through adolescents must differ from that for adults and describes what seriously ill or injured children generally experience in today's EMS systems. The book points the way to integrating EMS-C into current emergency programs and into broader aspects of health care for children. It gives recommendations for ensuring access to emergency care through the 9-1-1 system, training health professionals from paramedics to physicians, educating the public, providing proper equipment, protocols and referral systems, improving communications among EMS-C providers, enhancing data resources and expanding research efforts and stimulating and supporting leadership in EMS-C at the federal and state levels. For those already deeply involved in EMS efforts, this volume is a convenient up-to-date and comprehensive source of information and ideas. More importantly, for anyone interested in improving the emergency services available to children, emergency care professionals from emergency medical technicians to nurses to physicians, hospital and EMS administrators, public officials, health educators, children's advocacy groups, concerned parents and other responsible adults, this timely volume provides a realistic plan for action to link EMS-C system components into a workable structure that will better serve all of the nation's children. *Emergency Vehicle Safety Initiative*, 2004

From Book's Introduction: As traffic volume increases and the highway and interstate system becomes more complex, emergency responders face a growing risk to their personal safety while managing and working at highway incidents. The purpose of this report is to identify practices that have the potential to decrease that risk as well as to reduce the number of injuries and deaths that occur while responding to and returning from incidents. **The complete travel guide for**
