Emergency Response Manual:

Hazardous Waste Operations and Emergency Response Manual Brian J. Gallant, 2006-02-02 Field technicians and emergency response personnel are often faced with the dangers of flammable combustible and chemically unstable materials. Although there are numerous procedures set forth by regulatory agencies like the Occupational Safety and Health Administration OSHA the Environmental Protection Agency EPA and the National Institute for Occupational Safety and Health NIOSH for effectively and safely dealing with such environmental hazards up until now there has been no single resource for training in this area. Based on the author's twenty plus years of field experience *Hazardous Waste Operations and Emergency Response Manual* is a comprehensive text that covers the complete curriculum requirements set forth by OSHA and HazWOPER. Highly accessible and broad in focus the book is equally useful as a technical resource for training a hands on reference for field operations and a textbook for environmental courses in a variety of areas. Coverage includes Methods recommended by professional societies and regulatory agencies including the National Fire Protection Association OSHA EPA and NIOSH. Practical examples and assignments in each chapter to supplement the text and enhance usefulness to students.
