Resource and Environmental Management Bruce Mitchell, 2019 In order to optimally manage the environment and natural resources it is vitally important to recognize that there is much more to consider than just the environment itself and the natural resources it provides A key consideration is also the interrelationship between natural ecosystems and human involvement and behavior This interaction is where the field of environmental resource management comes into play the complex ecological and sociological systems of the natural world intertwined The purpose of this book is to consider such matters and to help readers develop their own capacities as environmental managers and stewards Bruce Mitchell s textbook Resource and Environmental Management served as the gold standard for many environmental science courses when the first edition published in 1997 Now twenty years later an updated third edition allows for the inclusion of recent developments The book covers the basic theories and concepts of environmental resource management and guides

students to be able to apply those concepts to practical situations By covering basic theories and concepts and by using case studies to show how these have been applied Bruce Mitchell s new edition seeks to ensure that students have competence in both aspects The text enhances the reader s capacity to conduct practice and research in resource and environmental management *Plant responses to flooding* Pierdomenico Perata,Rens Voesenek,Rashmi Sasidharan,Chiara

Pucciariello,2015-01-05 *Sustainable Energy Production and Consumption: System Accounting, Integrated Management, Policy Responses* Xu Tang,Jing Meng,Benjamin Craig McLellan,2022-01-04 Plastic Ocean: Art and Science Responses to Marine Pollution Ingeborg Reichle,2021-07-05 Our oceans are in an ecological crisis due to their contamination with millions of tons of toxic microplastic particles In just a few years the volume of microplastic particles will exceed that of plankton in our oceans and turn them into a huge sea of plastic This publication brings together numerous international art projects related to environmental activities DIY biotechnology and science and draws attention to the irreversible destruction of our marine ecosystems the current threat posed by the loss of marine animal biodiversity for example or the decline in oxygen production due to massive plankton loss It also presents current scientific findings on sustainable alternatives to plastic

Morphological Plant Modeling: Unleashing Geometric and Topological Potential within the Plant Sciences

Alexander Bucksch,Dan Chitwood,2017-10-13 An increasing population faces the growing demand for agricultural products and accurate global climate models that account for individual plant morphologies to predict favorable human habitat Both demands are rooted in an improved understanding of the mechanistic origins of plant development Such understanding requires geometric and topological descriptors to characterize the phenotype of plants and its link to genotypes However the current plant phenotyping framework relies on simple length and diameter measurements which fail to capture the exquisite architecture of plants The Research Topic Morphological Plant Modeling Unleashing Geometric and Topological Potential within the Plant Sciences is the result of a workshop held at National Institute for Mathematical and Biological Synthesis NIMBioS in Knoxville Tennessee From 2 4 September 2015 over 40 scientists from mathematics computer science engineering physics and biology came together to set new frontiers in combining plant phenotyping with recent results from shape theory at the interface of geometry and topology In doing so the Research Topic synthesizes the views from multiple disciplines to reveal the potential of new mathematical concepts to analyze and quantify the relationship between morphological plant features As such the Research Topic bundles examples of new mathematical techniques including persistent homology graph theory and shape statistics to tackle questions in crop breeding developmental biology and vegetation modeling The challenge to model plant morphology under field conditions is a central theme of the included papers to address the problems of climate change and food security that require the integration of plant biology and mathematics from geometry and topology research applied to imaging and simulation techniques The introductory white paper written by the workshop participants identifies future directions in research education and policy making to integrate

biological and mathematical approaches and to strengthen research at the interface of both disciplines *A Handbook of Environmental Toxicology* J.P.F. D'Mello, 2019-12-04 Written by an international team of authors from a range of educational medical and research establishments this book is an essential reference for advanced students and researchers in the areas of environmental sciences ecology agriculture environmental health and medicine in addition to industry and government personnel responsible for environmental regulations and directives A Handbook of Environmental Toxicology focuses on two key aspects human disorders and ecotoxicology as affected by major toxins originating from biological sources and pollutants as well as radiation generated spontaneously or as a result of anthropogenic activity A diverse array of these potentially harmful agents regularly appear in the atmosphere soil water and food compromising both human health and biodiversity in natural and managed ecosystems Public Responses to Fossil Fuel Export Hilary Boudet, Shawn Hazboun, 2022-01-29 Public Responses to Fossil Fuel Export provides wide ranging theoretical and methodological international contributions on the human dimensions of fossil fuel export with a distinctive focus on exporting countries some of which are new entrants into the marketplace What do members of the public think about exporting fossil fuels in places where it is happening What do they see as its main risks and benefits What connections are being made to climate change and the impending energy transition How have affected communities responded to proposals related to fossil fuel export broadly defined to include transport by rail pipeline and ship Contributions to the work are presented in three parts The first part synthesizes the background of the project outlines major social science theories and relevant previous research and identifies global trends in energy production Regional and national case studies related to public opinion on fossil fuel export are included in part two of the manuscript Part three highlights community based case studies Implications for research and practice feature in the concluding chapter Serves as a definitive reference on the social dimensions of fossil fuel export bringing together case examples and public opinion research from around the world on this important but understudied issue Explores the broader implications for growing field of energy social science particularly those focused on public perceptions of energy development siting controversies and community impacts from energy development Provides practical and policy implications including the need for better community inclusion in export and transport facility siting decisions the changing status of certain fuels impacts on public awareness and the relevance of the movement of energy resources **Climate Change 2014 - Impacts, Adaptation and Vulnerability: Global and Sectoral Aspects** Christopher B. Field, Vicente R. Chaiken,2016-11-30 As the global climate shifts communities are faced with a myriad of mitigation and adaptation challenges These highlight the political cultural economic social and physical vulnerability of social groups communities families and individuals They also foster resilience and creative responses Research in hazard management humanitarian response food security programming and other areas seeks to identify and understand factors that create vulnerability and strategies that enhance resilience at all levels of social organization This book uses case studies from around the globe to demonstrate ways that communities have fostered resilience to mitigate the impacts of climate change *Humanitarian Crises, Intervention and Security* Liesbet Heyse,Andrej Zwitter,Rafael Wittek,Joost Herman,2014-10-10 Offers a new theoretical framework for evidence based programming in humanitarian action Encompasses the theories of security studies anthropology and sociology for students and practitioners of humanitarian intervention Will be of much interest to students of humanitarian intervention human security peace and conflict studies and IR in general as well as NGOs and policymakers Plant Responses to Biotic and Abiotic Stresses: Lessons from Cell Signaling Sylvain Jeandroz,Olivier Lamotte,2017-12-28 Facing stressful conditions imposed by their environment and affecting their growth and their development throughout their life cycle plants must be able to perceive to process and to translate different stimuli into adaptive responses Understanding the organism coordinated responses involves a fine description of the mechanisms occurring at the cellular and molecular level A major challenge is also to understand how the large diversity of molecules identified as signals sensors or effectors could drive a cell to the appropriate plant response and to finally cope with various environmental cues In this Research Topic we aim to provide an overview of various signaling mechanisms or to present new molecular signals involved in stress response and to demonstrate how basic fundamental research on cell signaling will help to understand stress responses at the whole plant level Climate Change 2014 – Impacts, Adaptation and Vulnerability: Part A: Global and Sectoral Aspects: Volume 1, Global and Sectoral Aspects Intergovernmental Panel on Climate Change (IPCC),2014-12-29 This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change IPCC will again form the standard reference for all those concerned with climate change and its consequences including students researchers and policy makers in environmental science meteorology climatology biology ecology atmospheric chemistry and environmental policy Nature-Based Solutions for Natural Hazards and Climate Change Borja Gonzalez Reguero,Fabrice Renaud,Silvana Di Sabatino,Brenden Jongman,Boris van Zanten,Michael W. Beck,Emmanuelle Cohen-Shacham,2023-01-27 *Plant Diversity and Biomass Dynamics under Environmental Variation* Arshad Ali,2023-04-25 **Post-Vietnam Dioxin Exposure in Agent Orange-Contaminated C-123 Aircraft** Institute of Medicine,Board on the Health of Select Populations,Committee to Evaluate the Potential Exposure to Agent Orange/TCDD Residue and Level of Risk of Adverse Health Effects for Aircrew of Post-Vietnam C-123 Aircraft,2015-05-20 From 1972 to 1982 approximately 1 500 2 100 US Air Force Reserve personnel trained and worked on C 123 aircraft that had formerly been used to spray herbicides in Vietnam as part of Operation Ranch

Hand After becoming aware that some of the aircraft on which they had worked had previously served this purpose some of these AF Reservists applied to the US Department of Veterans Affairs VA for compensatory coverage under the Agent Orange Act of 1991 The Act provides health care and disability coverage for health conditions that have been deemed presumptively service related for herbicide exposure during the Vietnam War The VA denied the applications on the basis that these veterans were ineligible because as non Vietnam era veterans or as Vietnam era veterans without boots on the ground service in Vietnam they were not covered However with the knowledge that some air and wipe samples taken between 1979 and 2009 from some of the C 123s used in Operation Ranch Hand showed the presence of agent orange residues representatives of the C 123 Veterans Association began a concerted effort to reverse VA s position and obtain coverage At the request of the VA Post Vietnam Dioxin Exposure in Agent Orange Contaminated C 123 Aircraft evaluates whether or not service in these C 123s could have plausibly resulted in exposures detrimental to the health of these Air Force Reservists The Institute of Medicine assembled an expert committee to address this question qualitatively but in a scientific and evidence based fashion This report evaluates the reliability of the available information for establishing exposure and addresses and places in context whether any documented residues represent potentially harmful exposure by characterizing the amounts available and the degree to which absorption might be expected Post Vietnam Dioxin Exposure rejects the idea that the dioxin residues detected on interior surfaces of the C 123s were immobile and effectively inaccessible to the Reservists as a source of exposure Accordingly this report states with confidence that the Air Force Reservists were exposed when working in the Operation Ranch Hand C 123s and so experienced some increase in their risk of a variety of adverse responses 5
