Fishes Out of Water Zeehan Jaafar, Edward O. Murdy, 2017-07-12 Mudskippers are amphibious fishes native to the Indo West Pacific and tropical western Africa Unlike most fishes mudskippers emerge to forage find mates and defend territories Adaptations to their morphology physiology and behavior enable mudskippers to accommodate both aquatic and terrestrial habitats For these traits mudskippers have long captured the fascination of scientists naturalists and fish hobbyists Some mudskipper taxa e.g. *Periophthalmodon* spp. *Periophthalmus* spp. *Boleophthalmus* spp. are readily observed on mudflats and mangrove forests during the ebb tide Correspondingly these conspicuous and widespread taxa are relatively well studied The autecology and basic biology for the remaining taxa e.g. *Apocryptodon* spp. and *Oxudercus* spp. are still poorly understood Fishes Out of Water Biology and Ecology

of Mudskippers is the first comprehensive book to synthesize published scientific information and observation on these fishes. Two dozen subject experts present thorough overviews in fifteen distinct chapters. Contents span mudskipper anatomy, distribution, systematics, physiology, ecology, and conservation. Unique adaptations to terrestriality are discussed within the context of each chapter. This authoritative reference equips the reader with the basic foundation to understand mudskipper biology and ecology while providing a framework in which emerging data are discussed. The book will be of interest to a broad range of students, researchers, and professionals in ichthyology, evolution, ecology, animal behavior, and comparative physiology.

Human Insecurities in Southeast Asia Paul J. Carnegie, Victor T. King, Ibrahim, 2016-08-30 This book is a collection of work by scholars currently pursuing research on human security and insecurities in Southeast Asia. It deals with a set of insecurities that is not readily understood or measurable. As such, it conceptually locates the threats and impediments to human security within relationships of risk, uncertainty, safety, and trust. At the same time, it presents a wide variety of investigations and approaches from both localized and regional perspectives. By focusing on the human and relational dimensions of insecurities in Southeast Asia, it highlights the ways in which vulnerable and precarious circumstances, human insecurities, are part of daily life for large numbers of people in Southeast Asia and are mainly beyond their immediate control. Many of the situations people experience in Southeast Asia represent the real outcomes of a range of largely unacknowledged socio-cultural, economic transformations interlinked by local, national, regional, and global forces, factors, and interests. Woven from experience and observations of life at various sites in Southeast Asia, the contributions in this volume give an internal and critical perspective to a complex and manifold issue. They draw attention to a variety of the less-than-obvious threats to human security and show how perplexing those threats can be. All of which underscores the significance of multidisciplinary approaches in rethinking and responding to the complex array of conditioning factors and interests underlying human insecurities in Southeast Asia.

Storying Multipolar Climes of the Himalaya, Andes and Arctic Dan Smyer Yü, Jelle J.P. Wouters, 2023-03-23 This book initiates multipolar climate/clime studies of the world's altitudinal and latitudinal highlands with terrestrial experiential and affective approaches. Framed in the environmental humanities, it is an interdisciplinary comparative study of the mutually embodied relations of climate, nature, culture, and place in the Himalaya, Andes, and Arctic. Innovation-driven, the book offers multipolar climate/clime case studies through the contributors' historical findings, ethnographic documentations, and diverse conceptualizations and applications of climate/clime, an overlooked but returning notion of place embodied with climate history, pattern, and changes. The multipolar climate/clime case studies in the book are geared toward deeper, lively explorations and demonstrations of the translatability, interchangeability, and complementarity between the notions of climate/clime and climate. Multipolar or multipolarity in this book connotes not only the two polar regions and the tectonically shaped highlands of the earth but also diversely debated perspectives of climate studies in the broadest sense. Contributors across the twelve chapters come from diverse fields of

social and natural sciences and humanities and geographically specialize respectively in the Himalayan Andean and Arctic regions The first comparative study of climate change in altitudinal and latitudinal highlands this will be an important read for students academics and researchers in environmental humanities anthropology climate science indigenous studies and ecology Chapters 8 and 9 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com/books/e/10.4324/9781003347026> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license *Chronicle Four-Year College Databook* Chronicle Guidance Publishers,2000-08 **The Report: Brunei**
