A Study Guide to Epidemiology and Biostatistics Richard F. Morton, John Richard Hebel, Robert J. McCarter, 2005 The Fifth Edition of this popular text is your student's comprehensive study guide to the basic principles of both epidemiology and biostatistics. Clear and concise study notes and exercises help your students learn and apply concepts in epidemiology and biostatistics while multiple choice examinations test their understanding. Application of these concepts to critical assessment of epidemiologic studies is emphasized. This updated and revised New Edition includes a new section on meta-analysis, revised self-assessment exercises, coverage of primary, secondary, and tertiary prevention in the context of screening for disease.

Study Guide to Epidemiology and Biostatistics John Richard Hebel, Robert McCarter, 2011-07-05 Help your students understand some of the most elusive fundamentals of epidemiology and biostatistics with this fully updated revision of the bestselling Study Guide to Epidemiology and Biostatistics. The Seventh Edition offers expanded chapters as well as coverage of new topics that have become prevalent in the medical literature such as receiver operator curve analysis to improve sensitivity, specificity, the power of a statistical test, one-tailed P values, comparison-wise significance levels versus study-wise significance levels, confidence interval and its relationship to statistical significance, meta-analysis with current methods for assessing heterogeneity and the potential for publication bias, and the use of propensity scoring to reduce bias in non-experimental studies. Key Features: 46 objectives expressed in behavioral terms cite the concepts to be learned and the level at which students are expected to perform; Study Notes which can be used as the sole source of input to cover the material or used to supplement attendance at a lecture series; Chapter Exercises which encourage students to immediately use their newly acquired knowledge and thus improve retention through practice; Multiple Choice Examinations which have the same scope and are on the same level that students may expect to encounter in professional examinations.
