Gatto John Taylor Against School:

Dumbing Us Down John Taylor Gatto, 2002-02-01 With over 70 000 copies of the first edition in print this radical treatise on public education has been a New Society Publishers bestseller for 10 years Thirty years in New York City s public schools led John Gatto to the sad conclusion that compulsory schooling does little but teach young people to follow orders like cogs in an industrial machine This second edition describes the wide spread impact of the book and Gatto s guerrilla teaching John Gatto has been a teacher for 30 years and is a recipient of the New York State Teacher of the Year award His other titles include *A Different Kind of Teacher* Berkeley Hills Books 2001 and *The Underground History of American Education* Oxford Village Press 2000

A Different Kind of Teacher John Taylor Gatto, 2000 Gatto analyzes the roots of the modern American education system outlining prescriptions for revitalizing the system advocating greater emphasis on critical analysis creativity practicality and real world exposure in the curriculum He calls on educators and administrators to acknowledge student s need for a spiritual and ethical framework upon which to build a good life

Weapons of Mass Instruction John Taylor Gatto, 2010-04-01 The transformation of schooling from a twelve year jail sentence to freedom to learn John Taylor Gatto s *Weapons of Mass Instruction* now available in paperback focuses on mechanisms of traditional education which cripple imagination discourage critical thinking and create a false view of learning as a byproduct of rote memorization drills Gatto s earlier book *Dumbing Us Down* introduced the now famous expression of the title into the common vernacular *Weapons of Mass Instruction* adds another chilling metaphor to the brief against conventional schooling Gatto demonstrates that the harm school inflicts is rational and deliberate The real function of pedagogy he argues is to render the common population manageable To that end young people must be conditioned to rely upon experts to remain divided from natural alliances and to accept disconnections from their own lived experiences They must at all costs be discouraged from developing self reliance and independence Escaping this trap requires a strategy Gatto calls open source learning which imposes no artificial divisions between learning and life Through this alternative approach our children can avoid being indoctrinated only then can they achieve self knowledge good judgment and courage

Temes,2003-07-07 In this authoritative book Mr Temes sets out a straightforward prescription for our schools which centers on the life of the individual teacher and rejects the billion dollar school reform industry The book celebrates the power of individual teachers to make a difference in their schools and communities as forces for bottom up change A cogent and stylish writer who brings zestful insights to his subject Urgent reading Daniel Asa Rose Forward

The State of the American Mind: Stupor and Pathetic Docility Amechi Okolo PhD,2010-06-10 This book The State of the American Mind Stupor and Pathetic Docility Volume One begins to unravel some of the most obvious perplexing embarrassing and enduring problems and contradictions of American history and sociology viz how could the American revolution that started with the most ringing and most inspiring Declarations of human equality in world history end up establishing the most vicious exploitative society the world ever knew Black chattel slavery and only ten percent white enfranchisement etc Further how could men of such great wisdom and intellect like George Washington James Madison Thomas Jefferson and others who were Enlightenment scholars and clearly knew that slavery was despicable and evil because they had variously experienced white servitude and slavery themselves collude to establish and institutionalize the horrible system of Negro chattel slavery in America and also disenfranchised over 90 percent of people of their own race actions that racism could not explain The structural institutional slavery system they

established and the resultant consequent racism hobbles America today as it did in the past and forced Eric Holder the Attorney General to declare that America is a nation of cowards when it comes to race discussions Thus this book starts with serious critical discussions of race in America and reveals what no textbook has ever done viz that most early American whites and Blacks were slaves an uncomfortable fact that would shock most Americans because it contradicts the orthodoxy or the dominant narrative that only Blacks were brought here in chains Further the book also shows the year Black slavery started something almost all textbooks got wrong It also shows who was the first Black slave in America something no textbook ever mentions It also shows when and how racism started in America and many other very sensitive and embarrassing but necessary issues that America avoids but must be frankly discussed for America to move forward This book therefore shatters the two dominant themes of Americas history and sociology that Blacks were brought into America in chains as slaves while whites came to America in search of freedom as Obama famously told us in his race speech Thus the crowning lesson of this book in addition to discussing some critical policy issues like education health care etc is that it discovers the centripetal force of the American society that eluded contemporary Americans because American bosses have laboriously concealed the facts from the public the scary but clearly healthy uniting fact that most Americans are united by their common ancestry their universal history and experience of servitude bond indentures and slavery Nothing is more universal more common and more shared in American history and sociology than the fact that most of our ancestors black and white were servants bond indentures and slaves who were dominated and super exploited by few overlords Colonial America was the preferred dumping ground for British outcasts rejects criminals masterless class vagabonds bond indentures slaves etc until 1776 when Australia replaced America as the British dump for its rejects and surplus citizens Thus that America was a nation founded by British rejects and losers is inherently more rational than the prevailing orthodoxy or the Obama theory of Americas founders that they were great honorable men who journeyed across the ocean for freedom because of the obvious reason that good powerful achieving citizens do not normally emigrate to new uncharted lands

The Exhausted School John Taylor Gatto,1993 Children, Their Schools and What They Learn on Beginning Primary School Genevoix Nana,2013-11-13 This research is a pioneering study in comparative education in the context of Cameroon in particular and Africa in general which highlights present day school and classroom instances of language socialisation as instantiating Anglophone and Francophone education traditions in their representation of the British and French educational legacies from the colonial era Its findings point to practices specific to each study site and to Anglophone and Francophone subsystems of education as they translate local national and global education perspectives and parallel Anglophone and Francophone cultures writ large The narrative analysis and findings of this study are therefore of relevance to educational communities in other countries as issues of language socialisation ideology identity bilingualism multilingualism and comparative education are raised from a language and culture learning angle The findings of this work also present

emerging patterns of communal practices resulting from the coexistence of both subsystems of education while the empirical data presented expose an inadequacy between official bilingualism discourse and its implementation in schools which may have a significant impact on future orientation of this policy in schools in Cameroon This book will be useful to scholars interested in the fields of language socialisation and comparative education in general and in Africa and Cameroon in particular It will also be of interest to language policymakers in the context of Cameroon as data from schools indicate that official bilingualism practice does not echo policy discourse and problematises the construct of a Cameroonian identity as constitutive of Anglophone Francophone and local cultures The data report however shows that the paradigm shift in teachers perceptions about the value of languages apparently influenced pupils attitudes towards the various languages to which they were being socialised both at home and in school and particularly shaped their understanding of the necessity of learning the second official language

Homeschooling Samuel L. Blumenfeld, 1997 More and more parents today are disillusioned with public education Instead of merely tolerating a faulty system expanding numbers of parents are turning to alternative education for their children Homeschooling describes what homeschooling is all about helps parents decide whether or not this choice fits their family lifestyle covers virtually every aspect of homeschooling and more

Unschooling Gina Riley, 2020-07-20 This book explores the history of the unschooling movement and the forces shaping the trajectory of the movement in current times As an increasing number of families choose to unschool it becomes important to further study this philosophical and educational movement It is also essential to ascribe theory to the movement to gain greater understanding of its workings as well as to increase the legitimacy of unschooling itself In this book Riley provides a useful overview of the unschooling movement grounding her study in the choices and challenges facing families as they consider different paths towards educating their children outside of traditional school systems

How to Dropout of School and Start Unschooling Andrew Bushard, Teachers lie and manipulate Listen to them and your life will suck Their system will fail you and you ll feel disillusioned and betrayed Fortunately we do have a way out of all the scams and games in life Unschooling can save us so read this book to find out how to dropout of the system and unschool yourself to the life of your dreams 34 pages

Blum, 2016-01-13 Frustrated by her students performance her relationships with them and her own daughter s problems in school Susan D Blum a professor of anthropology set out to understand why her students found their educational experience at a top tier institution so profoundly difficult and unsatisfying Through her research and in conversations with her students she discovered a troubling mismatch between the goals of the university and the needs of students In *I Love Learning I Hate School* Blum tells two intertwined but inseparable stories the results of her research into how students learn contrasted with the way conventional education works and the personal narrative of how she herself was transformed by this understanding Blum concludes that the dominant forms of higher education do not match

the myriad forms of learning that help students people in general master meaningful and worthwhile skills and knowledge Students are capable of learning huge amounts but the ways higher education is structured often leads them to fail to learn More than that it leads to ill effects In this critique of higher education infused with anthropological insights Blum explains why so much is going wrong and offers suggestions for how to bring classroom learning more in line with appropriate forms of engagement She challenges our system of education and argues for a reintegration of learning with life **America's Best School Teachers and Principals** United States.
