Opportunity Greg J. Duncan,Richard J. Murnane,2014-01-01 In this landmark volume Greg J Duncan and Richard J Murnane lay out a meticulously researched case showing how in a time of spiraling inequality strategically targeted interventions and supports can help schools significantly improve the life chances of low income children The authors offer a brilliant synthesis of recent research on inequality and its effects on families children and schools They describe the interplay of social and economic factors that has made it increasingly hard for schools to counteract the effects of inequality and that has created a widening wedge between low and high income students Restoring Opportunity provides detailed portraits of proven initiatives that are transforming the lives of low income children from prekindergarten through high school All of these programs are research tested and have demonstrated sustained effectiveness over time and at significant scale Together they offer a powerful vision of what good instruction in effective schools can look like The authors conclude by outlining the elements of a new agenda for education reform Restoring Opportunity is a crowning contribution from these two leading economists in the field of education and a passionate call to action on behalf of the young people on whom our nation s future depends Copublished with the Russell Sage Foundation Selected Readings in Mineral Economics F.J.

Anderson,2013-10-22 Selected Readings in Mineral Economics reviews the economic principles of mineral investment activities and mining decisions Topics range from mineral reserves and exploration to the economics of mineral projects taxation issues and marketing and finance This text is comprised of 27 chapters After explaining the distinction between resources and reserves this book proposes a concept of mineral reserves The chapters that follow explore the conversion of resources into reserves through the exploration process while focusing on the flow from resources to reserves and metal production based on the concept of the monitoring curve along with the process of depletion and reserves replacement The next section illustrates the range of issues associated with rational project evaluation in the minerals sector considering the discounted cash flow techniques and option pricing as an approach to mine valuation The effects of Canada s tax system on the mineral supply process are then examined together with international mineral markets and finance This text concludes with a chapter that analyzes financing methods for large scale mining projects including innovative methods of debt finance involving risk sharing This book will be of interest to those working in the mining and metallurgical industries *Energy*
