web mar 10 2021 two methods for calculating stress in crane hooks which have given good results in practice are described one method based on a numerical integration of the curved bar equations involves only slide rule accuracy and may be used for irregular shapes of cross section

stress analysis of crane hook and validation by photo elasticity - Dec 29 2022

web jan 1 2011 to study the stress pattern of crane hook in its loaded condition a solid model of crane hook is prepared with the help of cmm and cad software real time pattern of stress concentration in 3d

crane hook analysis for different cross section using ansys - Aug 25 2022

web the pattern of stress distribution in the 3d model of the crane hook is obtained using ansys 19.2 software in this present work the obtained stresses by using finite element analysis and the winker batch method in different cross sections are compared to reduce the stress formed in sections by changing its design

[stress analysis of crane hook with different cross sections](#) - Jun 22 2022

web condition a solid model of crane hook is prepared with the help of abaqus software real time pattern of stress concentration in 3d model of crane hook is obtained the stress distribution pattern is verified for its correctness on an acrylic model of crane hook using shadow optical method caustic method setup
