Human Development Report 1982

I. Wallace

Human Development Report 1982:

World Development Report 1984 World Bank, 1984 Long term needs and sustained effort are underlying themes in this year's report. As with most of its predecessors it is divided into two parts. The first looks at economic performance past and prospective. The second part is this year devoted to population: the causes and consequences of rapid population growth, its link to development, why it has slowed down in some developing countries. The two parts mirror each other: economic policy and performance in the next decade will matter for population growth in the developing countries for several decades beyond. Population policy and change in the rest of this century will set the terms for the whole of development strategy in the next. In both cases policy changes will not yield immediate benefits but delay will reduce the room for maneuver that policy makers will have in years to come. *From "Climate-Smart" to "Climate-Just Agriculture"* Anthony Pahnke, 2025-07-03

Combining innovative social theory with ongoing policy discussions on climate change, this book analyzes past and present efforts at challenging global poverty through reforming the dynamics of worldwide agricultural production. Focusing on the efforts of the World Bank and CGIAR research centers, particularly through research and projects that have been launched by the International Maize and Wheat Improvement Center CIMMYT and the International Food Policy Research Institute IFPRI, *Climate Smart to Climate Just* exposes how neoliberal principles of limited government and individual entrepreneurship have expanded through the development of Climate Smart Agriculture. At the same time, an alternative Climate Just Agriculture is becoming possible as rightwing populists have disrupted international free trade orthodoxy and social movement demands for food sovereignty gain traction in key international spaces. As Pahnke explains in this innovative account, Climate Just Agriculture includes structural changes to free trade agreements that would build from local and regional food systems to make them resilient in the face of the adverse effects of climate change. This resiliency moreover allows marginalized groups the capacity to create and participate in markets that allow for greater self-sufficiency to push back on colonialism and imperialism. Written in a clear and accessible style, this book will be essential reading for students and scholars of sociology, environmental studies, and politics, as well as for policymakers and professionals involved in climate change policy and the agriculture and food industry. *World Scientific Reference On Asia-Pacific Trade Policies (In 2 Volumes)* Kym

Anderson, 2019-12-19 Protectionism has been placed under the media spotlight with news headlines generated by populist anti-globalization movements and Donald Trump's term as US President. Such a policy stance is putting at risk unilateral trade reform efforts in the Asia Pacific region and elsewhere. This two-volume reference work provides a timely update on how far the region has come in opening markets. It analyzes the motivations or ostensible objectives of policies adopted in the past, the changing extent of the domestic price distortions involved, the economic effects of those policies at home and abroad, the political economy forces at work that brought about those policies and their subsequent reform, their consequences for international trade, economic welfare, and poverty alleviation, and prospects for sustainable improvements in current policies.

Case studies of major East Asian economies and Australia reveal how government priorities to assist farmers versus manufacturers changed over the past century but especially since the 1980s and how that has affected trade between natural resource poor and resource rich economies This set is highly recommended for those who are interested in the economics and politics of trade policies agricultural economics economic development and food and nutrition security in the Asia Pacific region and beyond

Wallace,2002-09-26 The author provides a treatment of world economic geography as a whole He sets out the historical context of the modern world along with the principal philosophies that have shaped our study of it and identifies the importance of the biophysical environment as well as cultural and political settings for economic activity

Food, States, And Peasants Alan Richards,2021-11-28 One of the most serious problems facing the Middle East and North Africa is the region s growing inability to feed its expanding population Rapidly escalating demand has made the region highly dependent on food imports and policy initiatives intended to increase domestic production have met with mixed success at best The contributors to this volume examine the historical origins of state policies toward agriculture recent policy changes and their effects on domestic supply and the social and political implications of these shifts Focusing on the region s largest agricultural economies contributors analyze Turkey s strong performance as well as Egypt s weak response to its agricultural problems Pricing investment strategies irrigation policies and the impact of large scale labor migration on agricultural sectors are discussed and a common theme of the interplay between politics and economics runs throughout

McGee, 2013-06-17 In the great cities of Latin America and Asia international business and local firms meet and in particular influence the development strategies of Third World countries The authors of Theatres of Accumulation argue that these cities play a crucial role in the process of capital accumulation and of unequal exchange and dependency They examine the twin patterns of convergence and divergence in lifestyles and economic activities and show how the flow of capital through the urban system brings net losses to the rural regions and further exacerbates income inequalities between regions and classes Theatres of accumulation provides an overview of urbanization in the Third World as well as specific case studies It deals with theoretical issues and projects the likely developments in urbanization in the future Armstrong and McGee s work is essential reading for social science and planning professionals and students in the developed world and the Third World who are concerned with urban processes This book was first published in 1985
