The Psychology and Management of Project Teams François Chiochio, E. Kevin Kelloway, Brian Hobbs, 2015-04-10 Organizations today are increasingly using projects in their daily activities Projects and project management principles frame goal attainment in academia and many business sectors and they even serve as theoretical footing for organizational change endeavors However the ubiquity of project management does not mean that project work project teams and the ways organizations use projects are well understood Moreover while project management theory and practice aim at providing structure and control to enable successful project completion an alarmingly high percentage of projects struggle or fail As the authors of The Psychology and Management of Project Teams explain this is in part because projects are still mostly managed as technical systems rather than behavioral systems Even

though project management researchers have become increasingly interested in factors that may have an impact on project management effectiveness their efforts fall short of addressing the human factor And unfortunately many project management scholars are largely unaware of the I O psychology literature relying for example on outdated models of motivation and team development On the other side I O psychologists who research groups and teams often ignore the contextual influences such as business sector project type placement in the organizational hierarchy and project phase and maturity that have a crucial impact on how a project will unfold In this volume a cross disciplinary set of editors will bring together perspectives from leading I O psychology and project management scholars The volume will include comprehensive coverage of team selection development learning motivation and communication conflict management and well being leadership diversity performance from a multi level perspective and career development In the concluding chapter a research agenda will provide a roadmap for an integrated approach to the study of project teams
